

FOR TRANSPORT OF FAECAL SPECIMENS FOR INTESTINAL PARASITE EXAMINATION

APACOR

30ml Transport Vials

PARASITOLOGY

SINGLE USE IN VITRO DIAGNOSTIC DEVICE

30ml Transport Vials

Unscrew cap from 30ml vial containing 15ml fixative.

Add 5g of sample to the vial, bringing the level to the sample line.

Reseal cap on vial tightly. Shake to emulsify the sample.

Return vial with enclosed emulsified sample to the laboratory for diagnosis.

In the laboratory intestinal parasites are confirmed by the identification of cysts, protozoan trophozoites, larvae and helminth eggs.

The priorities of these clinical laboratories do not always permit the immediate examination of a fresh sample.

The prompt collection and transportation of these samples cannot always be guaranteed.

Furthermore, freezing, refrigeration and / or incubation of samples cannot ensure the full recovery of parasites at all stages of identification.

The Apacor Transportation Vial will preserve the intestinal parasites in the faecal material until such time it can be examined by a qualified parasitologist.

PRODUCT ORDERING

Apacor Product Code	Product Description	Pack Size
149970	30ml Transport Vial (Clean)	40
148998	30ml Transport Vial with 15ml Formalin & Triton X	40
249400	30ml Transport Vial with 15ml SAF	40
