

Solar Silver

Intelligent Urodynamics

Solar Silver is a state of the art system offering all tools needed for today's urodynamic and pelvic floor investigations.

The plug-and-play concept, combined with universal connectivity provides unrivalled flexibility in configuring a system to meet your specific diagnostic needs.

Complete Measurement & Analysis

Solar Silver offers multiple diagnostic investigation capabilities including complete urodynamics, gynecology study, anorectal manometry and biofeedback.

Comprehensive Patient Database

An extensive database enables easy entry and retrieval of patient demographics. Extensive filter and query functions are optional and facilitate easy sorting and selection of patient groups for further analysis.

Modularity

Solar Silver is standardly equipped with a 4-roller pump. It can easily be adapted to both your current situation and your future requirements such as wireless flow, Neuro-urology, EMG and automated Leak Point Pressure recording through Conductance.

Networking

Solar Silver is designed to be easily linked to a Hospital Information System (HIS) as well as the outside world. Security features include access levels regulate data sharing rights, patient record locking mechanisms, and secure file exchange over the internet.

Video Urodynamics

Solar Silver offers an unsurpassed range of video applications for analog and digital images. Single and cine loop images are captured in real time and synchronized with pressure measurements.

Remote Operation

Infrared remote control operates entire system from a separate location.
