## Navigation

## Bookmarks

The Sarstedt catalogue is divided into product categories by means of bookmarks. These bookmarks are directly linked with the corresponding product groups.

## Show Bookmarks

The above link can activate and deactivate bookmarks. Pressing 'F5' activates or deactivates the same function throughout the entire catalogue.

## Index

Navigation is also possible with the index. Product names and topics provide an overview of the Sarstedt product range. By clicking on the product name or topic, the corresponding pages will appear. In addition, every cross reference in the catalogue is interlinked for easy access to the individual topics.

## Show Index

## Sarstedt (O)Internet

## Information

## Order No. Index

The order number index at the end of the catalogue enables easy navigation when you already know the order number of a particular product. By clicking on the product number, the links will direct you to the corresponding catalogue page.

## Show Order No. Index

Search

The integral search function of Adobe Acrobat ${ }^{\circledR}$ enables the user to search the catalogue for product numbers or key words. Start this function by clicking on the 'Search' button or 'strg+f'. Then type the key word or product number to be directed to the corresponding page.

The 4th generation
S-Monovette ${ }^{\oplus}$ offers all the advantages of a modern blood collection system.

The enclosed blood collection system, consisting of S-Monovette ${ }^{\ominus}$ and needle, has been significantly developed with four innovations.
Therefore, blood collection is improved, reliability increased and the risk of infection minimised even further. The proven advantages of the system, such as a screw cap for avoiding the aerosol effect, graduation for optical volume control and impact resistance remain important characteristics of our S-Monovette ${ }^{\ominus}$.

1 The S-Monovette ${ }^{\ominus}$ needle is enhanced by an improved bevel and optimised glide following skin puncture. This minimises discomfort during blood collection.

2 The deeper recessed membrane prevents direct contact with the puncture site on the membrane. The result is even greater protection against infection and safe use of the S-Monovette®.

3 A 3-pin locking mechanism on the S-Monovette ${ }^{\ominus}$ further improves the connection with the needle. This combination of the needle and S-Monovette ${ }^{\ominus}$ blood collection system guarantees minimum patient discomfort.

4 The highly transparent plastic materials used in the manufacture of the $S$-Monovette ${ }^{\ominus}$ ensure optimal visual assessment of the sample quality.

## Sediplus ${ }^{\circledR}$ Blood Sedimentation System

## Combined system for safe blood collection and sedimentation

$\square$ Automatic and manual determination in accordance with Westergren
$\square$ Safety cap in sedimentation pipette prevents leakage of blood
$\square$ Simple adjustment of the blood column to zero through thread
$\square$ Bubble-free filling of pipettes
$\square$ Sedimentation pipette with assembled piston insert
Sediplus ${ }^{\circledR}$ system S-Monovettes and sample tubes are shown on pp. 14 and 33.

## Accessories for Sediplus ${ }^{\circledR}$

Sedimentation pipette including assembled piston insert

Sediplus ${ }^{\circledR}$ S 100Optimum results when used in combination with the Sediplus ${ }^{\circledR}$ ESR system10 ESR samples measured simultaneously and independently
$\square$ Digital readout of results and measurement time via a multi-functional display

Sediplus ${ }^{\circledR}$ ESR system without or with a computer/ printer interface (see p. 158).

ESR rack with graduated back wall Order Number: 90.1060

ESR rack without graduated back wall (for graduated pipettes)
Order Number: 90.1060.062

Please order a special leaflet for further information.

## S-Sedivette ${ }^{\oplus}$ Enclosed ESR System

## Enclosed system from blood collection to blood sedimentation

## Sediplus ${ }^{\circledR}$ S 200

Based upon experience with the proven Sediplus ${ }^{\text {® }}$ S 100, the Sediplus ${ }^{\circledR} 200$ has been designed to work in combination with the $S$-Sedivette ${ }^{\text {e }}$ for the safe determination of sedimentation rates.

Readings are provided preconverted in mm .

Blood collection with the proven S-Sedivette ${ }^{\circledR}$
ESR determination in the collection tube
$\square$ Sample transfer avoided, no sedimentation pipette
$\square$ Hygienic and safe to use
$\square$ Economical and time-saving

S-Sedivette ${ }^{\circledR}$
Order Number: 06.1690.001
Packaging: 500 pcs./case
ESR rack with graduation
Order Number: 90.1090

Sarmix ${ }^{\circledR}$ M 200
Sarmix ${ }^{\oplus}$ M 200 has been specifically designed for the S-Sedivette ${ }^{\oplus}$ to
 ensure careful and gentle mixing after blood collection and prior to analysis.

## Sarmix ${ }^{\circledR}$ M 2000

Rotor with 40 positions and an optimized mixing program for use with the S-Sedivette ${ }^{\text {® }}$

Sediplus ${ }^{\circledR}$ S 2000
Automated 40-channel instrument for ESR determination using the S-Sedivette ${ }^{\circledR}$
$\square 40$ samples can be measured simultaneously and independently
$\square$ May be extended to 160 positions using extension modules

See pp. 158-159 for further information or order our special brochure

## Special Analytics

## S-Monovette ${ }^{\circledR}$ ThromboExact for thrombocyte determination when pseudothrombocytopenia is suspected

The term pseudothrombocytopenia defines the preanalytical phenomenon of an erroneously low thrombocyte count that may occur in combination with automatic blood cell analysers.
Generally, pseudothrombocytopenia is caused by thrombocyte aggregation. Early detection of this phenomenon ensures that the diagnostic and therapeutic consequences of a thrombocytopenia misdiagnosis are avoided.

## S-Monovette ${ }^{\oplus}$ ThromboExact

$\square$ Prevents the formation of thrombocyte aggregation
$\square$ Ascertains multiple intolerance reactions (e.g. to Heparin and/or Citrate) in addition to the most common intolerance to EDTA
$\square$ Provides an accurate thrombocyte count up to 12 hours after blood collection

| Order Number | Description | Nominal <br> Volume | Packaging |
| :---: | :---: | :---: | :---: |
| 05.1168 .001 | S-Monovette <br> ThromboExact | 2.7 ml | 50 /inner case <br> $500 /$ case |

## S-Monovette ${ }^{\oplus}$ Homocysteine

Preanalytical conditions play a decisive role in homocysteine determination because erythrocytes in a collected blood sample continue to produce homocysteine.
Without stabilization, homocysteine diffuses into the serum/plasma at a significant increase in concentration of approximately 10\% per hour.

## S-Monovette ${ }^{\ominus}$ HCY-C for analyses from citrated plasma

$\square$ Pre-dosed acidic citrate ( pH 4.3 ) enables sample stability for 6 hours at room temperature
$\square$ Increased sample stability for up to 48 hours when stored in a refrigerator
$\square$ Pre-dosed citrate requires a multiplication factor of 1.11 to obtain the diagnostic homocysteine value

## S-Monovette ${ }^{\ominus}$ HCY-Z-Gel for analyses from serum

$\square$ A stabilizer ensures constant HCY concentration of the sample prior to centrifugation for 8 hours at room temperature
$\square$ After centrifugation, the pre-dosed gel forms a diffusion barrier between the serum and the blood clot, enabling a prolonged sample stability for up to 96 hours when stored at room temperature

| Order Number | Description | Nominal <br> Volume | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |

Packaging: All S -Monovettes detailed above are supplied sterile and are packaged in units of 50 per box, 500 per case.

## Serum Separation (Clotting Activator) <br> After blood collection the sam will is coated onto plastic the sample weads normally clot within 20 to 30 minutes. A clotting activato the blood clot and serum sample after centrifugation. The serum sample is suitable for all routine Clinical Chemistry and Serological investigations. For the physical separation of

 (see page 22).
## Serum Separation Gel (Clotting Activator)

After centrifugation, the gel provides an effective barrier between the blood clot and serum. sampling container in combination with Clinical Chemistry analysers.

Heparin is the anticoagulant of choice for Clinical Chemistry investigations on plasma. The which, due to their specific density, form a barrier between the red cell layer and plasma after centrifugation. Heparinized plasma is suitable for most routine Clinical Chemistry investigations. For the physical separation of plasma from the red cell layer after centrifugation,
we recommend our Seraplas ${ }^{\text {s }}$ separators (see page 22).

## Plasma Separation Gel (Lithium Heparin)

After centrifugation, the gel provides an effective barrier between the plasma and the red cell layer. This prevents diffusion from the cells into the plasma during transport, analysis and storage.

EDTA is the anticoagulant of choice for almost all routine haematological investigations. Each S-Monovette ${ }^{\text {® }}$ contains sufficient potassium EDTA to achieve a concentration of $1.2-2 \mathrm{mg}$ EDTA/ml blood after collection. Maximum dilution caused by the liquid anticoagulant is $1 \%$, The effectiveness of EDTA is not impaired by storage-induced drying.

## Glucose Determination (Fluoride)

Fluoride salt, as a glycolysis inhibitor, is combined with an anticoagulant as a preparation for the performance of glucose estimations. Each S-Monovette ${ }^{\circ}$ contains sufficient fluoride salt to achieve a final concentration after sampling of $2-3 \mathrm{mg} / \mathrm{ml}$ blood

## Coagulation (citrate)

Citrate ( 0.106 molar solution) is the anticoagulant of choice for all physiological coagulation studies. Provided the recommended volume of blood is drawn, each S-Monovette ${ }^{\text {e }}$ contain a dilution ratio of 1 in 10 ( 1 part citrate +9 parts blood) after collection.

Citrate ( 0.106 molar solution) is the anticoagulant of choice for Erythrocyte Sedimentation Rate (ESR) determination. Provided the recommended volume of blood is drawn, each For the automatic determination of ESRs, we recommend the Sediplus ${ }^{\text {S }}$ S 100, S 200 and S 2000 instruments (see pages 10-11).

## Blood Gas Analysis (Lithium Heparin, calcium-balanced)

Calcium-balanced Lithium Heparin (for measuring ionized calcium or magnesium) is the位 Lithium Heparin is $50 \mathrm{I} . \mathrm{U} . / \mathrm{ml}$ blood on average after sample collection.

| Order No. | Packaging |
| :---: | :---: |
| 14.1112 | ind. wrapped/sterile, $1,000 /$ case |

For blood collection with Luer systems, the Multifly ${ }^{\text {® }}$ needle is also available without adapter.
Packaging:
ind. wrapped, 500/case
The Multi-Adapter, available in Luer and Luer-Lock version allows the S-Monovette ${ }^{\oplus}$ to (e.g. catheters, blood collection sets, etc.).

## The Membrane adapter allows a

 Thevice with a Luer fitting (e.g device with a Luer fitting (e.g blood gas Monovette ${ }^{\circledR}$, syringe,etc.) to be used in combination etc.) to be used in combination
with S-Monovette ${ }^{\circledR}$ and Multifly needles.

## Multi-Safe Disposal Boxes

User-friendly screw-off and turn-off aids in lid
A Stepped recess to twist off sharps
B U-shaped recess to take off Luer-system sharps
C Star-shaped recess to twist off insulin pens

## Safety-Tray

Safety-Tray for the safe transport of blood collection accessories
Designed for use in blood collection routine, the Safety-Tray is ideally suited to accommodate Multi-Safe disposal boxes 0.7 l and 1.51, dispenser boxes with lid, cups and racks with handles in a variety of colours.
Note: Accessories (disposal boxes, cups etc.) are not included in the scope of supplies) and must be ordered as separate items.
We do not offer any disinfectant spray.

[^1]Modular Technology for Efficient Sample Preparation in the Clinical Laboratory

## Solutions for

 routine workloadsThe ef ficiency of a laboratory depends to a large extent on the quality and ef ficacy of its Any laboratory, $r$ benefit fr om systems that automate sample preparation.
Sarstedt instrumentation simplifies $r$ outine operations with high thr simplifies $r$ outine instrument loading, cost savings, and gr eater safety and precision.

## Decapper DC 1200

At a rate of 1,200 tubes per hour, the Decapper DC 1200 r emoves screw caps and stoppers Tubes are loaded via analyser -specific racks. Caps are e disposed of hygienically . Repetitive motion injuries and accidental exposur e risks associated with decapping are reduced

## Recapper RC 1200

The Recapper RC 1200 places a universal anti-evaporation crap, which accommodates tubes for storage. Repetitive motion iniuries associated with manually inserting caps ar eliminated.
HSS Sample Sorting System The HSS Sample Sorting System was specially developed for rapid sample tube pr e- and post-analysis sorting.
Communicating with the laboratory's LIS, up to 1,400 tubes can be identified and opened per hour and sorted into defined distribution
The instrument also recaps and sorts tubes for post-analysis storage.

## PVS Sample Distributor

The modular design of the PVS Sample
Distribution System enables the simple integration of automated pre-analysis and post-analy-
sis into a laboratory's existing organisation Sis into a a aboratory's existing organisation. (serum, whole blood, urine) simultaneously. The sers identifies sample tubes by the bar code
code and cap colour, produces bar-coded secondary tubes with sample aliquots, and sorts primary tubes directly into analyser-speciicic racks. post-analysis storage.

A detailed brochure covering these products is available on request

## Intelligent concepts for pre- and post-analytical sample processing

## Accessories for Blood Collection

## Seraplas ${ }^{\circledR}$ V <br> Valve separator for the separation of serum/plasma and blood clot after centrifugation

After separation, the plunger can be removed easily due to special connection between valve and plunger. Due to the design of the valve the dimensions of the sample container remain unchanged after separation. This combination of valve and sample tube makes the product particularly suitable for direct sampling.
The valve separator forms a physical barrier which prevents diffusion between the cell layer and sample during transport, analysis and storage.

| Order Number | Description | Suitable for <br> S-Monovette <br>  <br>  <br> $-\varnothing$ | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |

## Capillary blood collection systems - As individual as your patients

Microvette ${ }^{\circledR}$ 100/200Capillary blood collection

The Microvette ${ }^{\circledR}$ capillary blood collection system is designed to offer practical solutions for individual requirements
Choose between the Microvette 100 and 200 with a conical or round bottom inner tube. For oth versions the End-to-End capillary is preassembled and ready for use.
The Microvette offers all the advantages of a modern capillary blood collection system: Assembled capillary for blood collectio
according to the End-to-End principle
according to the End-to-End principle

- Special twist cap design is easy to open and minimizes aerosol effect
- Optimized tube geometry ensures thorough sample mixing
- Colour coded caps and print for easy

Colour coded caps and print for easy
identification of addditives and volume

- Shelf life and batch number on each tube
- Can also be used without capillary for collec tion along tube rim.

Blood collection with assembled $100 \mu \mathrm{l}$ or $200 \mu \mathrm{l}$ End-to-End capillary

Assembled End-to-End capillary and graduation

## Capillary and venous blood collection in one system

## Multivette ${ }^{\circledR} 600$

For venous blood collection, a Luer needle is connected to the capillary tube of the Multivette ${ }^{\oplus}$. The special design enables selffilling of the inner tube by normal venous pressure.
Hygienic and safe capillary blood collection is performed using the End-to-End principle. The performed using tue End-to-ind principle.
special capillary tube is designed to hold a volume of $600 \mu$ l of capillary blood.

- Venous blood collection is performed by
 tube of the Multivette ${ }^{\bullet}$
- Hygienic and safe capillary blood collection according to the End-to-End principle
Graduations ensure volume control
- Maximum volume $600 \mu$ l

```
*When collection blood with a Luer needle, make sure to remve the 
```

The colour-coded cap and graduations eliminate the risk of sample mix-ups

## The system for optimum serum/plasma recovery

## Microvette ${ }^{\circledR}$ CB 300

The capillary tube with push cap is supplied complete with a carrier tube that is also suited for transport and centrifugation.
After centrifugation, the capillary tube is sealed with the cap attached to the push cap. The trumpet-shaped capillary tube ensures opti-
mum serum/plasma recovery after centrifugation. For efficient working in the laboratory, the For efficient working in the laboratory, the
capillary tube accommodated in its carrier tub capiliary tube accommodated in its carrier
can be placed directly into the analyser.

- Optimum serum/plasma recovery afte centrifugation
- Two in one - sample container and centrifuge tube
- Compatible with different analysers as a primary tube for direct sampling

Easy sampling Volumes up to $300 \mu \mathrm{l}$

## Microvette ${ }^{\circ}$ CB 300

| Preparation | Order Number |  |
| :--- | :--- | :--- |
| Serum / Clotting activator |  | 16.440 |
| Serum / Clotting activator | dyed brown | $16.441^{*}$ |
| Plasma / Lithium Heparin |  | 16.443 |
| Plasma / Lithium Heparin | dyed brown | $16.434^{*}$ |
| Haematology / Potassium EDTA | 16.444 |  |
| Glucose / Fluoride | 16.446 |  |

* Pigmented brown for bilirubin determination

Microvettes are packaged in units of 50 ( $1,000 /$ case ).

- Easy drawing off of the supernatant
- Optimum serum/plasma recovery after centrifugation
- Capillary tube supplied with carrier tube for sampling Capillary tube supplied with carrier tube for
transport and centrifugation in one system

## Microvette ${ }^{\circledR}$ CB 200 ESR/Safety-Lancet

## Microvette ${ }^{\circledR}$ CB 200 ESR

## Measurement of sedimentation in capillary blood

The Microvette ${ }^{\oplus}$ CB 200 ESR preloaded with citrate comes with an attached stopper, an assembled and prepared end-to-end collection capillary, and a sedimentation capillary.
$\square$ Proven to perform well in comparison with the Westergren methodCollection volume of only $200 \mu$ ensures minimum patient discomfort

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |
| 18.1325 | Microvette $^{\oplus} \mathrm{CB} 200 \mathrm{ESR}$ | 500 |

## ESR Rack

The ESR racks with graduated back wall and 10 measurement positions has been specially designed for the Microvette ${ }^{\circledR}$ CB 200 ESR.

ESR Rack for the Microvette ${ }^{\oplus}$ CB 200
Order Number: 90.1091

## Safety-Lancet

## For safe capillary blood collection and increased patient comfort

The new Safety-Lancet is primed and ready for use.
It reduces the risk of needle injury and cross contamination because the needle point or blade is concealed both before and after use.
The sterile device is for single-use only and can be safely discarded.
A range of penetration depths and widths are available to accommodate various volume requirements and skin types, ensuring optimum blood flow.
$\square$ User and patient safety
$\square$ Patient comfort
$\square$ Designed for targeted blood flow

## UriSet 24

## UriSet 24

## Complete set for standardised and patient-friendly

## 24 hour urine collection

$\square$ Urine container -
Completely new $3,000 \mathrm{ml}$ container with ergonomically shaped, wide $80 \mathrm{~mm} \varnothing$ opening and transparent inspection strip for optimal volume reading.

## Receptacle -

500 ml cup enables patient-friendly urine collection and transfer from the urine container into the transport tube.

## Stabilizer -

A glass bottle with integral safety dropper contains 9 ml of $20 \%$ hydrochloric acid concentration, requiring no additional working steps and providing improved patient safety. The amount and concentration of hydrochloric acid has been dosed to ensure optimal stabilisation of the urine for up to 7 days for the analysis of catecholamines, metane-phrines, homovanillic acid and 5 -hydroxyindole-acetic acid. This long-term stability at room temperature enables the collection of urine samples at the laboratory and collective processing per batch.

## Transport tube or Urine Monovette ${ }^{\circledR}$

Only the enclosed 30 ml tube or Urine Monovette ${ }^{\oplus}$ is transported to the doctor or the laboratory while the urine container is discarded by the patient. The system reduces the waste volume at the doctor's practice or laboratory. A self-adhesive label for reliable patient identification is enclosed with the transport tube.

## Tube with screw cap for collection of a defined faeces sample

This faeces tube enables a clean and simple separation of a defined faeces sample of 1 ml , approx. 1 g .
The spoon has a capacity of 1 ml , any excess is removed with the enclosed spatula. The spoon is fixed to the cap and projects down the middle of the tube. This construction enables centrifugation and separation of a supernatant without disturbance on opening.

## Example:

Immunological procedure for the determination of occult blood
When adding e.g. 2 ml distilled water to the faeces tube, a suspension is produced by simple mixing. After centrifugation, proteins such as human haemoglobin and albumin can be analysed from the supernatant by means of immunological procedures.

Literature on this procedure is available on request.

[^2]
## Faeces Containers/Miscellaneous Tests

## 25 ml and 70 ml Faeces Containers

The 25 and 70 ml containers are manufactured from robust, white polypropylene. The brown screw cap includes an integral sampling scoop. The containers are primarily used for the collection of faeces samples for pathology. They are also very convenient for the collection of grain and soil samples.

| Order Number <br> Material | Volume <br> ml | Length/ $\varnothing$ <br> mm | Description | Packaging <br> Pcs./Case |

## Salivette ${ }^{\circledR}$

## Hemoplus® ${ }^{\circledR}$

## Test for the detection of occult blood in faeces based on the chromagen Guaiac resin

## Eliminates risk of mix-ups

One Hemoplus ${ }^{\circledR}$ test card contains all 12 test positions. The risk of mix-ups with other test cards is excluded.

## Balanced sensitivity

Hemoplus ${ }^{\circledR}$ will not detect normal physiological blood loss. The test sensitivity has been established to be within the range required for colo-rectal cancer screening.

The test principle is based on the pseudoperoxidase activity of haemoglobin which may be present in faeces. The 12 test positions on each test card contain chromatographic filter paper impregnated with distilled Guaiac resin as an indicator. A stabilised alcoholic hydrogen peroxide solution acts as a developing reagent.

Haemoglobin will catalyse the oxidation of the chromogen Guaiac resin in the presence of hydrogen peroxide to form a blue-coloured compound.

## Contents of kit

1 Hemoplus kit contains:
50 patient tests (one test card and 12 cardboard spatulae per envelope)
Two 30 ml bottles of developing reagent
Detailed instructions for use
$\square$ Variable application
Each test card is divisible into 3 separate sections which allows Hemoplus ${ }^{\oplus}$ to be used for individual patient tests as well as for multiple testing.
$\square$ Test confidence
The recommended use of four test positions for each investigation increases the probability of detecting a positive result in a non-homogenous faeces sample.
$\square$ Simple analysis
A positive result is clearly indicated by a blue colouration which is stable for at least 60 seconds.

## Hemoplus ${ }^{\circledR}$ kit

Order Number: $\quad 51.1444 .001$
(one kit contains $50 \times 3$ tests)

## Laboratory Products

## Reagent and Centrifuge Tubes

Reagent and centrifuge tubes in compact StackPack
All tubes marked $\mathrm{O}_{0} \mathrm{on}^{\circ}$ are supplied in the advantageous space saving StackPack version.

These tubes can also be supplied "loose in bags". By adding a .005 to the article number you will get the order number (e.g. 55.476.005 = 75/12 PS loose).

Comparison of packing volume:
loose in bags

## Tubes with paper label

## Standard label

Instead of print, the tubes are also available with a standard paper label.
These labels can be printed with additional information at additional cost.
The labels are available in white with black print.

## Special label separately on rolls

Standard labels as illustrated. Available in full rolls only.

| Order Number | Label Size | Pcs./Roll |
| :---: | :---: | :---: |
| 84.1556 .010 | $40 \times 26 \mathrm{~mm}$ | 5,000 |
| 84.1027 .010 | $62 \times 40 \mathrm{~mm}$ | 5,000 |

## Special label / Barcode label

The labels detailed above are also available with customised print. The tubes can also be supplied with barcode labels.
The Minimum order quantity for special labels on tubes is 10,000 pieces, individual labels with special print are available on request.
PS = polystyrene, transparent • *caps on pp. 57-58

## Micro Tubes

## Products for superior quality requirements

Over 25 years ago, Sarstedt introduced a new laboratory standard: the safe screw cap micro tube. The Sarstedt screw cap micro tube is now used worldwide and is a crucial part of daily research and diagnostic work.

The secure screw cap closure with O-ring seal and the robust polypropylene tube make this product a versatile tool that is ideal for centrifugation, transport, and storage of high quality synthetic oligonucleotides, enzymes, buffers etc.

To accommodate the highly sophisticated needs of customers working in the field of medical research, environmental technology, the pharmaceutical and food industries as well as in cellular and molecular biology, screw cap micro tubes are now also available in the certified PCR Performance Tested and Biosphere ${ }^{\circledR}$ purity standards.
 RNase-free • ATP-free

Further information on Sarstedt quality standards for laboratory products on page 68.

Transport and storage container for high-grade synthesized oligonucleotides, enzymes, buffers etc.

The biological purity of certified laboratory products is guaranteed by a controlled production process that complies with the strictest purity requirements, ensuring that our customers can achieve utmost reproducibility in their analyses and research experiments.

Practical single-handed opening and closing in special gripper rack

## Certified Screw Cap Micro Tubes

## For uncompromising quality and purity

## Micro Tubes in special sterile packaging

Each bag is sub-packaged into a second, additional bag. Removing the outer bag leaves a completely sterile bag packaging for convenient processing in clean rooms or sterile environments. This packaging option is ideal for users working under clean room conditions to fill precious reagents into the tubes.

Micro tubes in special sterile packaging

## Sarstedt quality symbols

## Warranty of reliability and reproducibility

To accomodate the highly sophisticated needs of customers working in the fields of medical research, environmental technology, the pharmaceutical and food industries as well as in cellular and molecular biology, Sarstedt developed Biosphere ${ }^{\oplus}$ quality products.

The superior biological purity of sterile laboratory products is guaranteed by a controlled production process that complies with the strictest purity requirements so that our customers can be sure to achieve utmost reproducibility in their analyses and research experiments.

All disposables, such as pipette tips and reaction tubes bearing the Biosphere ${ }^{\circledR}$ symbol are sterile, DNA-, RNase- and ATP-free and non-pyrogenic.

Sterility is validated according to DIN EN and AAMI guideline.

#### Abstract

PCR and other molecular-biological methods are used in laboratories all over the world. Therefore, Sarstedt has refined the production requirements for non-sterile PCR products, as well Skilled personnel, clean room conditions along with automated production processes enable contamination-free manufacturing.

Products awarded the PCR Performance Tested distinction meet the following requirements:
$\checkmark$ DNase-/RNase-free
$\checkmark$ Human DNA-free
$\checkmark$ PCR inhibitor-free

## Multiply ${ }^{\circ}$ PCR Reaction Tubes

## Multiply ${ }^{\circledR}$ PCR single tubes

## Contamination-free opening of attached lid due to integral anti-contamination shield at the lid front

Rapid temperature transfer due to thin-walled reaction spaceFrosted, flat lid with large writing areaEasy opening of tightly fitting lidDesigned for use in all thermocyclers in 0.2 and 0.5 ml block formatCompatible with the RackSystem working station for pipetting and storage of 0.2 ml tubes
Multiply ${ }^{\circledR}$-Pro 0.2 and 0.5 ml with integral anti-contamination shield at the lid front
$\square$ Biosphere ${ }^{\circledR}$ quality (sterile) packaged in small quantities

## DuoPlate PCR Plates

## The new generation of PCR plates in a dual material design

In comparison to single-component polypropylene plates, the characteristic feature of the DuoPlate PCR plates is a combination of two different materials that stand out for their excellent anti-torsion quality and rigidity. Consequently, concerns like distortion, shrinkage and sample loss which occur occasionally during PCR cycles with single-component PCR plates are minimised.
$\square \quad$ Enhanced sealing characteristics
Thermo-stable frame minimises leakage/sample loss
$\square$ Optimal compatibility with high-throughput systems
Dual material design enables precise and safe use in automated systems
$\square \quad$ Maximum biological and technological safety
Certified PCR Performance Tested quality guarantees absence of human DNA, RNase/DNase and PCR inhibitors, together with $100 \%$ leak testing of ultra-thin PP wells
$\square$ Optimized for real-time PCR
DuoPlate Fluo (white wells, black frame), especially developed for maximum signal intensity and minimised cross talk

## SafeSeal Micro Tubes

## NEWN SafeSeal Micro Tubes

... provide maximum sample security for general laboratory use, particularly for thermal applications.

$0.5,1.5$ and 2.0 ml SafeSeal micro tubes are available in two additional purity qualities to meet the requirements in medical and molecular-biological research.

PCR Performance Tested
$\square$ DNase-/RNase-free, Human DNA-free, PCR inhibitor-free
Biosphere ${ }^{\circledR}$
$\square$ Sterile, DNA-, RNase-, ATP-free and non-pyrogenic
To reduce storage time in open bags and inherent contamination risks, Biosphere ${ }^{\oplus}$ Micro Tubes are packaged 50 pieces per bag. For more stringent demands in sample preparation, individually wrapped SafeSeal micro tubes in Biosphere ${ }^{\circledR}$ quality are now available to exclude potential risks of contamination.

## Low Protein Binding Micro Tubes NEW

Minimum protein binding = maximum recovery rate $=$ minimum protein loss

As the trend toward decreasing sample volumes continues, it becomes increasingly important to minimise potential interaction between the analyte and tube. In response to this demand, our new low protein binding micro tube is specially designed to meet the requirements in protein analytics while maximising protein recovery rates.
Aside from low sample volumes, minimising protein loss is particularly essential for low protein concentrations to enable further analysis.

| Order Number | Volume | Version | Packaging |

## Biosphere ${ }^{\oplus}$ Pipette Tips with Filter

## Certified purity - more than just sterile

Many fields of modern research and analytics use highly sensitive techniques such as PCR as a standard procedure. Using pipette tips with integral
 filter constitutes an easy and safe measure to reduce the risk of carry-over contamination. The exact positioning of the filter barrier prevents the filter material from being contaminated with the sample liquid, thus enabling contamination-free pipetting of DNA, RNA, toxic or infectious specimens.
Filter serving as an aerosol barrier The filter in the pipette tip serves as an aerosol barrier against air pollutants likely to contaminate the pipette in the aspiration process. Thus, any subsequent pipetting procedures with a new tip and specimen are protected against cross contamination. Sarstedt's Biosphere ${ }^{\circledR}$ quality and purity standard apply to filter tips with a variable range from $0.1 \mu \mathrm{l}$ to $1,250 \mu \mathrm{l}$.

## Economical packaging in bags

Non-sterile filter tips for loading into empty boxes (refer to pp. 80) are packaged in small, economical, bagged units that are certified PCR Performance Tested.

Cross section of a porous filter element (40-fold magnification)

## Reliable safety with selected filter materials

The filter element integrated in the pipette tips consists of a porous plastic material featuring defined hydrophobic properties and no self-sealing additives.

- The sponge-like material is densely composed of randomly arranged channels (see picture on left), enabling air to pass for precision when using air displacement pipettes.
- Simultaneously, the complex structure of the porous filter safely prevents aerosols from entering the pipette shaft. (Reference 20386)

For more information, Sarstedt's Application Report 'Shielding effect of filter inserts in pipette tips' is available upon request.

## Added protection with Biosphere ${ }^{\ominus}$ purity quality

$\checkmark$ Maximum biological purity: free from DNA, RNase, ATP and pyrogens
$\checkmark$ Batch-specific certification is available upon request

## Convenient and safe packaging of individual tip boxes

$\checkmark$ Each tip box is additionally and aseptically protected in a special sterile bag packaging
$\checkmark$ Easy opening of bag packaging without aid via notch at short bag side (see picture)

## Tip Handling

## Tip SystemBox

## Economic, versatile and simple to use

Compact, environmentally friendly, and reusable

## Tip SystemBox

The autoclavable (important notes on autoclaving: see p. 163) Tip SystemBox is the central work station for all 96 -tip Sarstedt trays.
Complete with hinged lid and anti-slip base, the Tip SystemBox readily accomodates refill trays from Tip StackPack or empty trays for racking.

Empty, colour-coded refill trays are available separately. See page 85 for ordering information.

## The Tip SystemBox: Central Pipetting Station

Flexible and
cost-effective

Empty 96-tip refill trays and bulk tips
Suitable for manually racking bulk tips for autoclaving and convenient handling.

Simple and practical

Economic and environmentally friendly

Tip StackPack
Efficient handling of 96-tip trays, reduced packaging and storage space.

## Tip Handling

## Tip StackPack and Refill Trays

## Tip StackPack

## Flexible, efficient and easy to use

Trays pre-loaded with 96 tips are stacked five or six high with only one base and cover, reducing packaging waste and storage space by more than 50\%.
$\square$ For high tip throughput, tips can be handled directly from the StackPack. Trays are securely attached but are easily separated when the next tray of tips is needed.
$\square$ Trays can be removed from the Tip StackPack and placed in the Tip SystemBox for individual use, i.e. to autoclave one 96-tip tray, without adjustment aids.
$\square$ Tip types A, C, E and F (see pages 81) are available in the Tip StackPack format.

## Empty refill trays for use in the Tip SystemBox

Users who purchase tips loose in bags may load empty trays (grey, yellow, orange) in the Tip SystemBox.Place the empty tray in the Tip SystemBox.
$\square$ Load the tray with tips.
$\square$ If necessary, autoclave (important notes on autoclaving: see p. 163) the tips in the Tip SystemBox

## DishRack

## DishRack - the practical Petri dish rack

DishRack for well organised and systematic working
DishRack is perfectly suited to accommodate, transport and store Petri dishes. DishRack facilitates and helps to organise individual working processes. Take your choice from a selection of 5 different colours and exchangeable writing strips.

## DishRack for optimum handling

Knocking over unstable stacks of dishes is now a thing of the past. With DishRack you have a firm grip on up to 88 Petri dishes in one step. Dishes may be taken from the rack at random, thus alleviating the laborious task of rearranging the whole stack. Whether at the analytical workstation, in the incubator or for sample storage - DishRack is a valuable aid for multipurpose applications.

## DishRack - the robust and safe transport aid

Elastic silicone strips ensure secure hold of the dishes in the rack even if exposed to heavy shaking and movement in transport.

## DishRack - made from resistant material

The DishRack is made from breakproof polycarbonate (PC) material.
DishRack - available in 2 versions
DishRack 50 for up to 52 Petri dishes $\varnothing 92$
DishRack 80 for up to 88 Petri dishes $\varnothing 92$

## Sarstedt Quality Symbol

## Certified Tissue Culture Products

In the field of cell and tissue culture, compliance with strict purity standards is essential to achieving reliability and consistency for in vitro applications.

Today, cell and tissue cultures are not only used in basic research but also in applied biotechnology and clinical research. Cell cultures are also increasingly used in toxicity tests, for quality control of chemical and biological products as well as for industrial applications, e.g. manufacturing monoclonal antibodies etc.

Sarstedt produces sterile disposables for sophisticated cell culture research. In particular, this range includes the following products:

■ TC Flasks

- TC Dishes
- 96/24/6 Well TC Plates
- Cell Scrapers
- Filtration units

To meet this growing demand and in accordance with our guiding principle that products coming into contact with cells must not have an adverse effect on the cells, these products are manufactured under stringent purity conditions and subjected to comprehensive quality testing. The final product is then certified non-pyrogenic and non-cytotoxic and marked with the "Come Grow With Us" quality symbol.

All tissue culture products meet the following requirements:<br>$\checkmark$ Sterile In accordance with DIN EN ISO and AAMI Guideline "Sterilization of Medical Devices - Validation and Routine Control of Sterilization by Irradiation"<br>\section*{$\checkmark$ Non-pyrogenic<br><br>Based on the LAL Test in accordance with the FDA Guidelines on Medical Devices}<br>$\checkmark$ Non-cytotoxic In accordance with DIN EN ISO 10993-"Biological Evaluation of Medical Devices - Part 5, Test on in-vitro Cytotoxicity"

## New Generation of Tissue Culture Flasks

...with the new Quick-Release Cap

Closed
Maximum 1/3 turn
for ergonomic
opening/closing
of the flask

Vented position
Lock the cap in the defined vented position by a simple turn

Open
Remove the cap by a quick 1/8 turn from the vented position

## ... with the new colour code system that offers maximum flexibility

## Depending on the cell's affinity to the growth surface and the user's requirements, three different colour coded surface options are available.

Adherent cells are easily cultivated in tissue culture flasks with a traditional tissue culture surface that are coded with a red or black quick-release cap.

Primary, established epithelial, and other fastidious cell lines that are difficult to grow on traditional surfaces may grow better on the growth surface offered by Cell ${ }^{+}$coded with a yellow quick-release cap.

A special coating of the growth surfaces with polylysines, collagens, or gelatins is often not necessary.

Special flasks with a hydrophobic surface that minimises cell loss attributed to unwanted cell attachment are coded with a green quick-release cap.

Problem-free cultivation of suspension and hybridoma cultures thanks to the hydrophobic growth surface.

Quick detachment of cells from the surface can be achieved by gently tapping the flasks.

## Cell+ Tissue Culture Products

## Tissue culture products for adherent cells

## Cell ${ }^{+}$growth surface for sensitive cell cultures

Cell ${ }^{+}$TC products for the growth of primary cultures and other fastidious cell lines are gamma-sterilised and made from high-quality polystyrene.

Cell ${ }^{+}$TC products particularly support the growth of various fastidious cell lines:
$\square$ Primary cultures
$\square$ Continuous cell lines
$\square$ Cells that normally require a coating of colagen, gelatin or polylysine for growth
$\square$ Cell lines that grow poorly on standard surfaces

## Cell ${ }^{+}$TC flasks with quick-release cap

$\square$ Yellow cap with and without ventilation - Plug Seal Cap
$\square$ Two-position screw cap with locking mechanism

## TC products for adherent cells

Tissue culture flasks with quick-release screw cap
$\square$ Two-position screw cap with positive venting mechanism
$\square$ With or without ventilation cap
$\square$ Made from high-quality polystyrene
Sterilised by gamma irradiation
$\square$ Hydrophilic surface for optimal attachment and growth of adherent cells
$\square$ Anti-tip skirt at canted neck
Tissue culture flasks with red cap,
with or without ventilation - Plug Seal Cap

| Order Number | Growth Area $\mathrm{cm}^{2}$ | $\underset{\mathrm{ml}}{\text { Volume }}$ | Screw Cap | Neck Shape | Packaging Bag/Case |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 83.1810 | 25 | 50 | PE | $7 \pm$ | 20/300 |
| 83.1810 .002 w v ventilation | 25 | 50 | PE | 二发* | 20/300 |
| 83.1811 | 75 | 250 | PE | Э $\square^{\circ}$ | 5/100 |
| 83.1811 .002 w v ventilation | 75 | 250 | PE | Э $=$ | 5/100 |
| 83.1813 | 75 | 250 | PE | 75 | 5/100 |

* $=$ with pouring channel

## Replacement caps for TC flasks with positive venting mechanism

To replace contaminated screw caps
$\square$ For gastight closing of ventilation flasks

| Order <br> Number | Flask Type | Packaging | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |
| 83.1890 .025 | T-25 | ind. wrapped, <br> sterile | 100 |
| 83.1890 .075 | T-75 <br> canted neck | ind. wrapped, <br> sterile | 100 |
| 83.1890 .175 | T-175 | ind. wrapped, <br> sterile | 50 |

## Tissue Gulture Products

## TC products for adherent cells

## TC plates with lid

$\square$ Lid with condensation rings
$\square$ Wells with raised rims
$\square$ Lid can only be placed onto the plate in one direction
$\square$ Stackable

| Order <br> Number | Growth Surface <br> $\mathbf{c m}^{2}$ | Number <br> of Wells | Max. <br> Volume | Base <br> Shape | Des- <br> cription | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 83.1835 | 0.35 | 96 | 0.38 ml |  | with lid | $1 / 50$ |
| 83.1836 | 2.0 | 24 | 3.6 ml |  | with lid | $1 / 50$ |
| 83.1837 | 0.35 | 96 | 0.38 ml | $\bigcup$ | with lid | $1 / 50$ |
| 83.1838 | 0.35 | 96 | 0.38 ml | $\bigvee$ | with lid | $1 / 50$ |
| 83.1839 | 9.5 | 6 | 17.2 ml |  | with lid | $1 / 50$ |

Tapes for Genomic, HTS, compound storage

| Order Number | Description | Tape material | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |
| 95.1994 | transparent | polyolefin | 100 |
| 95.1995 | non-transparent | aluminum | 100 |

Tapes for standard applications
(ELISA plates, sample storage $-40^{\circ} \mathrm{C}$ to $100^{\circ} \mathrm{C}$ )

| Order Number | Description | Tape material | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |
| 82.1586 | transparent | acetate | 100 |

## Tissue culture dishes in SUREGrip Design

$\square$ Convenient handling due to a raised ring around the circumference of the dish, enabling an easy and secure grip of both the dish and lid, even from a whole stack.

| Order Number | Growth Area <br> $\mathbf{c m}^{2}$ | $\varnothing /$ Height <br> $\mathbf{m m}$ | Description | Packaging <br> Bag/Case |
| :--- | :---: | :---: | :---: | :---: |
| 83.1800 | 8 | $35 / 10$ | standard | $20 / 500$ |
| 83.1800 .001 | 8 | $35 / 10$ | with grid | $20 / 500$ |
| 83.1801 | 21 | $60 / 15$ | standard | $20 / 500$ |
| 83.1801 .001 | 21 | $60 / 15$ | with grid | $20 / 500$ |
| 83.1802 | 58 | $100 / 20$ | standard | $20 / 300$ |
| 83.1803 <br> non-SUREGrip | 152 | $150 / 20$ | standard | $10 / 100$ |

## Tissue Culture Products

## TC products for adherent cells

## Roller bottle for mass cell culture

$\square$ Made from virtually unbreakable, clear polyethylene-terephtalate glycol (PETG)Printed graduations from 50 to 1400 mlSterilised by gamma radiation, packed in 5 pieces

| Order <br> Number | Growth Area <br> $\mathbf{c m}^{2}$ | Length/ <br> $\mathbf{m m}$ | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: |
| 83.1815 | approx. 850 | $267 / 120$ | $5 / 20$ |

## Coverslips for microscopy

$\square$ Highly transparent coverslips for culturing adherent cells
$\square$ Sterilised by gamma radiation

| Order <br> Number | $\varnothing \mathrm{mm}$ | Packaging <br> Bag/Case |
| :---: | :---: | :---: |
| 83.1840 | 25 | $25 / 200$ |
| 83.1840 .001 | 22 | $25 / 200$ |
| 83.1840 .002 | 13 | $25 / 200$ |

Pos. 1

## Cell scraper with soft, flexible blade

$\square$ An alternative to enzymatic detachment of monolayer cultures to avoid cell alterations
$\square$ Easy and more complete separation of monolayer due to extra
 thin and flexible blade
$\square$ When downward pressure is applied to the handle, the flexible blade can remove all cells in its path with one smearSterilised by gamma radiation, individually wrapped
Cell scraper with 2-position blade

| Order <br> Number | Cell Scraper Length <br> $\mathbf{c m}$ | Blade <br> $\mathbf{m m}$ | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: |
| 83.1830 | 25 | 17 | $1 / 100$ |
| 83.1832 | 16 | 13 | $1 / 100$ |

Cell scraper for use in larger TC flasks (T-175)

| Order <br> Number | Cell Scraper Length <br> cm | Blade <br> mm | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: |
| 83.1831 | 39 | 31 | $1 / 100$ |

## Tissue Gulture Products

## TC products for suspension and hybridoma cells

PE ventilation cap

Non-wettable $0.2 \mu \mathrm{~m}$ hydrophobic filter membrane for reproducible gaseous exchange

$\square$ For minimisation of interactions between cell culture and growth surface
$\square$ Reduced cell loss due to hydrophobic surface
$\square$ Sterilised by gamma irradiation

$\square$ Anti-tip skirt at canted neck
Tissue culture flasks with green quick-release screw cap - with or without Plug Seal Cap

| Order Number | Growth Area $\mathrm{cm}^{2}$ | Volume ml | Screw Cap | Neck Shape | Packaging Bag/Case |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{array}{\|l\|} 83.1810 .500 \\ 83.1810 .502 \\ w . \text { ventiation } \end{array}$ | $\begin{aligned} & 25 \\ & 25 \end{aligned}$ | $\begin{aligned} & 50 \\ & 50 \end{aligned}$ | $\begin{aligned} & \text { PE } \\ & \text { PE } \end{aligned}$ | $\begin{aligned} & \exists \mathbb{0} \\ & \square=0 \end{aligned}$ | $\begin{aligned} & 20 / 300 \\ & 20 / 300 \end{aligned}$ |
| $\begin{array}{\|l\|} 83.1813 .500 \\ 83.1813 .502 \\ w . \text { ventilation } \end{array}$ | $\begin{aligned} & 75 \\ & 75 \end{aligned}$ | $\begin{aligned} & 250 \\ & 250 \end{aligned}$ | $\begin{aligned} & \text { PE } \\ & \text { PE } \end{aligned}$ | $\begin{aligned} & 700 \\ & {[0]=} \end{aligned}$ | $\begin{aligned} & 5 / 100 \\ & 5 / 100 \end{aligned}$ |
| $\begin{array}{\|l\|} 83.1812 .500 \\ 83.1812 .502 \\ w . \text { ventilation } \end{array}$ | $\begin{aligned} & 175 \\ & 175 \end{aligned}$ | $\begin{aligned} & 650 \\ & 650 \end{aligned}$ | $\begin{aligned} & \text { PE } \\ & \text { PE } \end{aligned}$ | $\begin{aligned} & \square=0 \\ & \square \sqrt{5}= \end{aligned}$ | $\begin{aligned} & 5 / 40 \\ & 5 / 40 \end{aligned}$ |

* with pouring channel • Replacement caps for TC flasks on p. 95.

## TC dishes in SUREGrip Design

$\square$ Convenient handling due to a raised ring around the circumference of the dish, enabling an easy and secure grip of both the dish and lid, even from a whole stack.

| Order <br> Number | $\varnothing /$ Height <br> mm | Description | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: |
| 83.1800 .002 | $35 / 10$ | hydrophobic <br> surface | $20 / 500$ |
| 83.1801 .002 | $60 / 15$ | hydrophobic <br> surface | $20 / 500$ |
| 83.1802 .002 | $100 / 20$ | hydrophobic <br> surface | $20 / 300$ |

TC plates with lid

| Order <br> Number | Number <br> of Wells | Max. <br> Volume | Description | Base Shape | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 83.1835 .500 | 96 | 0.38 ml | with lid <br> sterile | $\bigsqcup$ | $1 / 50$ |
| 83.1837 .500 | 96 | 0.31 ml | with lid <br> sterile | $\bigcup$ | $1 / 50$ |
| 83.1838 .500 | 96 | 0.29 ml | with lid <br> sterile | $\bigvee$ | $1 / 50$ |
| 83.1836 .500 | 24 | 3.6 ml | with lid <br> sterile | $\bigsqcup$ | $1 / 50$ |
| 83.1839 .500 | 6 | 17.2 ml | with lid <br> sterile | $\bigsqcup$ | $1 / 50$ |

## Filtropur Filter Systems

Syringe filter Filtropur S for filtration of aqueous solutions up to 100 ml
$\square$ Bio-compatible prefilter is free from binding agents, and membrane is free from wetting agentsLow protein binding membranes
Individually wrapped and sterile
Non-pyrogenic

Filtropur $\mathbf{S} 0.45$ yellow housing
for sterilisation and particle removal from solutions

| Order <br> Number | Inlet/Outlet <br> Connection | Filtration <br> Surface | Pore Size | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: |
| 83.1826 | inlet luer-lock <br> femae <br> outlet luer-lock <br> male | $5.3 \mathrm{~cm}^{2}$ | $0.45 \mu \mathrm{~m}$ | $1 / 50$ |

Filtropur S 0.2 dark blue/neutral housing for sterile filtration

| Order <br> Number | Inlet/Outlet <br> Connection | Filtration <br> Surface | Pore Size | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: |
| 83.1826 .001 | inlet luer-lock <br> female <br> outlet luer-lock <br> male | $5.3 \mathrm{~cm}^{2}$ | $0.2 \mu \mathrm{~m}$ | $1 / 50$ |

Filtropur S plus 0.2, blue/opaque housing with integral glass prefilter, for sterile filtration of viscous solutions

| Order <br> Number | Inlet/Outlet <br> Connection | Filtration <br> Surface | Pore Size | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: |
| 83.1826 .102 | inlet luer-lock <br> female <br> outlet luer-lock <br> male | $5.3 \mathrm{~cm}^{2}$ | $0.2 \mu \mathrm{~m}$ | $1 / 50$ |

Filtropur V vacuum filtration unit / Filtropur BT bottle top filter
$\square$ Improved performance for sterile filtration
$\square$ Low protein and nucleic acid bindingTime and cost saving by higher throughput
$\square$ Enhanced safety due to special, resistant Filtropur membrane
$\square$ Non-pyrogenic
Filtration units

| Order <br> Number | Description | Filtration Volume | $\varnothing$ <br> Membrane | Pore Size | Packaging <br> Bag/Case |
| :--- | :---: | :---: | :---: | :---: | :---: |
| 83.1822 | Filtropur V 25 | 250 ml | 65 mm | $0.45 \mu \mathrm{~m}$ | $1 / 12$ |
| 83.1822 .001 | Filtropur V 25 | 250 ml | 65 mm | $0.20 \mu \mathrm{~m}$ | $1 / 12$ |
| 83.1823 | Filtropur V 50 | 500 ml | 85 mm | $0.45 \mu \mathrm{~m}$ | $1 / 12$ |
| 83.1823 .001 | Filtropur V 50 | 500 ml | 85 mm | $0.20 \mu \mathrm{~m}$ | $1 / 12$ |

A sterile screw cap for the collection vessel is included with each filtration unit.
Bottle top filter for storage vessel with an outer diameter of 45 mm max.

| Order <br> Number | Description | Filtration Volume | $\varnothing$ <br> Membrane | Pore Size | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 83.1822 .100 | Filtropur BT 25 | 250 ml | 65 mm | $0.45 \mu \mathrm{~m}$ | $1 / 12$ |
| 83.1822 .101 | Filtropur BT 25 | 250 ml | 65 mm | $0.20 \mu \mathrm{~m}$ | $1 / 12$ |
| 83.1823 .100 | Filtropur BT 50 | 500 ml | 85 mm | $0.45 \mu \mathrm{~m}$ | $1 / 12$ |
| 83.1823 .101 | Filtropur BT 50 | 500 ml | 85 mm | $0.20 \mu \mathrm{~m}$ | $1 / 12$ |

Receiver Bottle

| Order <br> Number | Description | Filtration Volume | Version | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: |
| 83.1822 .003 For Filtropur 250 ml Screw cap assembled, <br>  individually wrapped, sterile   | $1 / 12$ |  |  |  |

## Filtropur L - Pressure Filtration Units

Pressure filtration system Filtropur L
with and without integral prefilter for the filtration of media, sera, buffers and other aqueous solutions
$\square$ Biocompatibility of all used materials
$\square$ Cellulose acetate membrane for low protein bindingFiltration range 100 ml to 10 LIndividually wrapped, sterile
Non-pyrogenic

Filtropur L 0.2 S
with integral glass-fibre prefilter for use in connection with pressure pumps (e.g. membrane pumps) or peristaltic pumps (e.g. tube pumps)

| Order <br> Number | Inlet | Pore Size | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: |
| 83.1827 | Tube connector <br> $(6-12 m m$ stepped <br> connector) | $0.2 \mu \mathrm{~m}$ | $1 / 50$ |

Filtropur L 0.2 LS
with integral glass-fibre prefilter for use in connection with pressure pumps (e.g. membrane pumps) or peristaltic pumps (e.g. tube pumps)

| Order <br> Number | Inlet | Pore Size | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: |
| 83.1827 .001 | Luer-Lock | $0.2 \mu \mathrm{~m}$ | $1 / 50$ |

Membrane pump with tube set,
stainless steel sinker, tube adapter for Filtropur L 0.2 LS

| Order Number | Packaging <br> Pcs./Case | Set |
| :---: | :---: | :---: |
| 83.1850 | 1 | 2.5 m silicon tube <br> 5 multi-function adapter <br> 1 stainless steel sinker |

## Tubes

## TC tubes sterile

TC quality, clear polystyrene
The pretreated polystyrene tubes with screw cap are especially suitable for:Culturing small cell populationsCulturing suspension or monolayer culturesStorage or transport of cell material
$\square$ The screw cap enables an open or closed growth environment for cell culture

| Order <br> Number | Volume <br> ml | Length/ $\varnothing$ <br> mm | Description | Packaging |
| :---: | :---: | :---: | :---: | :---: |
| 83.9923 .945 | 15 | $125 / 16$ | round bottom |  |
| 83.9923 .943 | 12 | $99 / 16$ | round bottom |  |
| 83.9923 .929 | 10 | $97 / 16$ | conical <br> with skirted base |  |

Centrifuge tubes, sterile, non-pyrogenic, with conical base, attached red screw cap, with graduations and writing space
$\square$ Clear PP enables perfect viewing of the sample material

| Order <br> Number | Volume <br> ml | Length/ $\varnothing$ <br> mm | Description | Packaging |
| :---: | :---: | :---: | :---: | :---: |
| 62.559 .001 | 50 | $114 / 28$ | with <br> skirted base | $25 / \mathrm{bag}$ <br> $300 / \mathrm{case}$ |
| 62.547 .004 | 50 | $114 / 28$ | without <br> skirted base | $25 /$ styrofoam rack <br> $200 / \mathrm{case}$ |
| 62.547 .254 | 50 | $114 / 28$ | without <br> skirted base | $25 / \mathrm{bag}$ <br> $250 / \mathrm{case}$ |
| 62.554 .002 | 15 | $120 / 17$ | without <br> skirted base | $50 /$ styrofoam rack <br> $500 / \mathrm{case}$ |
| 62.554 .502 | 15 | $120 / 17$ | without <br> skirted base | $50 / \mathrm{bag}$ <br> $500 / \mathrm{case}$ |

## Rack for conical 50 ml tube (2 rows of 5 apertures each) Order Number 93.1645

Tubes with ventilation cap, sterile, round base, neutral 2-position cap
$\square$ For open and closed incubation
$\square$ Centrifugable

| Order <br> Number | Volume <br> ml | Length/ $\varnothing$ <br> $\mathbf{m m}$ | Description | Packaging <br> Bag/Case |
| :---: | :---: | :---: | :---: | :---: |
| 55.526 .006 PP <br> 55.476 .013 PS | 5 | $75 / 12$ | without print | $25 / 1,000$ |
| 62.526 .028 PP <br> 62.476 .028 PS | 5 | $75 / 12$ | with printed <br> graduations | ind. wrapped, sterile <br> $1 / 500$ |
| 62.515 .006 PP | 13 | $100 / 16$ | with printed <br> graduations | $25 / 500$ |
| 62.515 .028 PP | 13 | $100 / 16$ | with printed <br> graduations | ind. wrapped, sterile |
| $1 / 400$ |  |  |  |  |

## CryoPure Storage System

## CryoPure - Certified Quality

CryoPure tubes are subjected to extensive testing to ensure that potential contaminants which could harm cell materials and cellular components during 'vital preservation' are not present.
Upon successfully meeting stringent testing criteria, CryoPure tubes are certified:

- Non-pyrogenic
- Non-cytotoxic
- Non-mutagenic
- Sterile

■ CE/IVD-compliant

## CryoPure Storage System

CryoPure 1.2 ml tubes with external thread

| Order <br> Number | Screw <br> Cap | Nominal <br> Volume | Packaging |  |  |
| :--- | :---: | :---: | :---: | :--- | :--- |
| 72.377 | white | 1.0 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.377 .002 | red | 1.0 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.377 .004 | yellow | 1.0 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.377 .005 | green | 1.0 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 / \mathrm{case}$ |
| 72.377 .007 | violet | 1.0 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | 2,000/case |
| 72.377 .992 | Colour Mix | 1.0 ml | $50 / \mathrm{bag}$ | 500/inner box | 2,000/case |

CryoPure 2.0 ml tubes with external thread

| Order Number | Screw Cap | Nominal Volume | Packaging |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 72.379 | white | 1.8 ml | 50/bag | 500/inner box | 2,000/case |
| 72.379.002 | red | 1.8 ml | 50/bag | 500/inner box | 2,000/case |
| 72.379.004 | yellow | 1.8 ml | 50/bag | 500/inner box | 2,000/case |
| 72.379.005 | green | 1.8 ml | 50/bag | 500/inner box | 2,000/case |
| 72.379.007 | violet | 1.8 ml | 50/bag | 500/inner box | 2,000/case |
| 72.379.992 | Colour Mix | 1.8 ml | 50/bag | 500/inner box | 2,000/case |

CryoPure 5.0 ml tubes with external thread

| Order <br> Number | Screw <br> Cap | Nominal <br> Volume | Packaging |  |  |
| :--- | :---: | :---: | :--- | :--- | :--- |
| 72.383 | white | 4.5 ml | $25 / \mathrm{bag}$ | $250 /$ inner box | 1,000/case |
| 72.383 .002 | red | 4.5 ml | $25 / \mathrm{bag}$ | $250 /$ inner box | 1,000/case |
| 72.383 .004 | yellow | 4.5 ml | $25 / \mathrm{bag}$ | $250 /$ inner box | 1,000/case |
| 72.383 .005 | green | 4.5 ml | $25 / \mathrm{bag}$ | 250/inner box | 1,000/case |
| 72.383 .007 | violet | 4.5 ml | $25 / \mathrm{bag}$ | 250/inner box | 1,000/case |
| 72.383 .992 | Colour Mix | 4.5 ml | 25/bag | $250 /$ inner box | 1,000/case |

CryoPure 2.0 ml tubes with internal thread and silicone O-ring

| Order <br> Number | Screw <br> Cap | Nominal <br> Volume | Packaging |  |  |
| :--- | :---: | :---: | :--- | :--- | :--- |
| 72.380 | white | 1.6 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.380 .002 | red | 1.6 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.380 .004 | yellow | 1.6 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.380 .005 | green | 1.6 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.380 .007 | violet | 1.6 ml | $50 / \mathrm{bag}$ | $500 /$ inner box | $2,000 /$ case |
| 72.380 .992 | Colour Mix | 1.6 ml | $50 / \mathrm{bag}$ | 500/inner box | 2,000/case |

## Colour-coded inserts for CryoPure tubes

| Order <br> Number | Colour | Packaging |
| :--- | :---: | :---: |
| 65.386 | white | $100 / \mathrm{bag}$ |
| 3,000/case |  |  |
| 65.386 .002 | red | $100 / \mathrm{bag}$ |
| 65.386 .004 | yellow | $100 / \mathrm{bag}$ |

## Serological Pipettes

## Serological pipettes from clear polystyrene

$\square$ Non-pyrogenic, individually wrapped, sterile
$\square$ Easy identification by international colour code
$\square$ Larger pipetting volume due to negative graduation
$\square$ Variable mode of handling due to reverse graduation
$\square$ Optimised mouthpieces for universal fit in most common pipettors
$\square$ Easy opening, static-free packaging
Serological Pipettes $1 \mathrm{ml}, 2 \mathrm{ml}, 5 \mathrm{ml}, 10 \mathrm{ml}, 25 \mathrm{ml}, 50 \mathrm{ml}$

| Order <br> Number | Total Volume/ <br> Graduation | Description// <br> Colour Code | Packaging <br> Pcs./Case |

*non-pyrogenic

## Aspiration Pipette, polystyrene

$\square$ For aspirating media with a vacuum pump
$\square$ Individually wrapped in paper/plastic peel packaging
$\square$ Certified non-pyrogenic
$\square$ Without graduation, without cotton plug

| Order <br> Number | Total Volume <br> Graduation | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |
| 86.1252 .011 | $2 \mathrm{ml} /$ without <br> graduation | without plug, <br> without print, ind. <br> wrapped, sterile | 1,000 |

## Easy size identification

by international colour code on individually wrapping

## 25 ml serological pipette in optimised design

Due to the size and weight of filled 25 ml pipettes, they are apt to have considerable range of movement in pipetting aid adapters. This undesirable motion makes the pipettes inconvenient to handle, impedes precise sampling and may even cause leaks at the pipette/adapter connection (dripping).
$\square$ Small guide ribs at the mouthpiece provide an improved fit in the adapter housing of any pipette aid to minimise undesirable swaying motion.
$\square$ Minimises the risk of dripping by a secure grip of the pipette as soon as the small guide ribs contact the gap between mouthpiece and adapter housing.

## Pipettes/Sarpette ${ }^{\circ}$

Dilution pipette with and without tip
For dilutions for bacteriological tests, e.g. in food labs, plugged and sterile

| Order <br> Number | Total Volume/ <br> Graduation | Description | Packaging |
| :---: | :---: | :---: | :---: |
| 86.1686 .225 | $1.1 \mathrm{ml} / 0.5-1.0-1.1$ | without tip | $25 / \mathrm{bag}$ <br> $1,000 / \mathrm{case}$ |

## Automatic-Sarpette ${ }^{\circledR}$

$\square$ New ergonomic designEven lighter for labour saving operation
$\square$ Environmentally friendly nickel metal hydride battery
$\square$ Three independant aspiration and dispensing speeds

Order Number: 90.189.100
with recharger and stand

Replacement membrane filter for Automatic-Sarpette ${ }^{\circledR}$ Order Number: 92.189.120 (5 pcs.)

## M-Sarpette ${ }^{\circledR}$

Operates without wires or batteriesDistinctly lighter in weight than automatic pipettors$\square$ Special valve system enables safe and precise pipettingIntegral hydrophobic filter functions as fluid barrierCompatible with pipettes of 1 to 100 ml volume
Order Number: 90.1427
Replacement membrane filter for M-Sarpette ${ }^{\circledR}$
Order Number: 92.1417.001 (5 pcs.)
Replacement silicon adapter
Order Number: 92.1417.002

## Standard Guvettes

Since the seventies, Sarstedt has been renowned as a supplier of high-quality plastic disposable cuvettes made from polystyrene (PS) and acrylic (PMMA). With a view to serving the UV range down to 220 nm which is gaining more and more importance, our product range has been complemented by a new UV transparent disposable cuvette (see on p. 107).
Due to its optical characteristics, polystyrene is ideal for use in the visual range and the UV transparent range down to 330 nm . At 334 nm , for instance, polystyrene has a spectral transmission ratio of about 70 to $80 \%$.
Acrylic cuvettes, on the other hand, stand out for their enhanced light transmission in the UV range and can be used down to approximately $\mathbf{3 0 0} \mathbf{n m}$. Their spectral transmission ratio at 334 nm , for instance, is between 80 to $90 \%$.

Transmission is wave length dependent T-\%

Typical values for polystyrene, acrylic and UV cuvettes

| Wavelength <br> in $\mathbf{n m}$ | Transmission in \% |  |  |
| :---: | :---: | :---: | :---: |
|  | UV cuvette | Acrylic cuvette | Polystyrene cavette |
| 260 | 73 | 23 | 0 |
| 280 | 86 | 68 | 0 |
| 313 | 94 | 93 | 66 |
| 334 | 96 | 97 | 79 |
| 366 | 97 | 98 | 90 |
| 405 | 98 | 99 | 95 |
| 560 | 98 | 99 | 96 |

Method: measured with distilled water against air, optical path length 10 mm .

Semi-micro cuvette $10 \times 4 \mathrm{~mm}$, optical pathway $10 \mathrm{~mm}, 1.6 \mathrm{ml}$

| Order <br> Number | Length <br> mm | Material | Packaging | Pcs./Case |

[^11]
## UV Micro Cuvette, special cuvettes

## UV Micro Cuvette

For measurements in the short-wave UV range below 300 nm , the material-related self-absorptive characteristics of PS and PMMA cuvettes increase distinctly as their transmission ratio decreases.
UV transparent cuvettes are specially suited for the photometric analysis of nucleic acids and proteins and can be used as an alternative to fragile and expensive glass or quartz cuvettes. UV cuvettes enable measurements in the visual and UV range down to 220 nm .

UV micro cuvette, $120 \mu \mathrm{l}$ minimum sample volume, 8.5 mm light center height, 10 mm optical path length, of precise optical quality
$\square$ Suitable for photometers of 8.5 mm light center height: Eppendorf Biophotometer, ThermoSpectronic, Perkin Elmer, Bio-Rad, Analytic Jena etc.
$\square$ Photometric analysis of nucleic acids at 260 nm and proteins at 280 nm
$\square$ Scratchproof packaging in Styrofoam containersCertified UV cuvettes (DNA-/RNase-/protein-free) individually sealed with caps optionally available for safe sample storage and prevention of contamination
$\square$ Dimensions (W x D x H): $12.5 \times 12.5 \times 45 \mathrm{~mm}$

## UV micro cuvette

| Order <br> Number | Length <br> mm | Packaging |
| :--- | :---: | :---: |

Adhesive film for microtest plates
Acetate foil (impermeable to air)

| Order Number | Packaging |
| :---: | :---: |
| 82.1586 | 100/case |

Terasaki microtest plates
60 Well plates, $10 \mu \mathrm{l}$ (tissue culture treated)
$\square$ For HLA tests
$\square$ For use with micro volumes for clinical and genetic investigations
10 Plates with lid/pack, gamma-sterile

| Order Number | Packaging |
| :---: | :---: |
| 83.9923 .972 | $490 /$ case |

PS = polystyrene

## MegaBlocke, Adhesive Sealing Tapes

MegaBlock ${ }^{\circledR} 96$ Well 1.2 / 2.2 ml
$\square$ Each well $100 \%$ leakproof tested
$\square$ Ideally suited for long-term sample storage
$\square$ Solvent resistant to DMSO (only Polypropylene Block)
$\square$ Square wells with round bottoms and alphanumeric coordinates for sample identificationManufactured under clean room conditions

| Order Number | Description | Volume/ <br> Material | Packaging |
| :---: | :---: | :---: | :---: |
| 82.1970 .002 | round wells | 1.2 ml PS transparent | $32 \mathrm{pcs} . / \mathrm{case}$ |
| 82.1971 .002 | round wells | 1.2 ml PP (autoclavable) | 32 pcs./case |
| 82.1972 .002 | square wells | 2.2 ml PP (autoclavable) | 32 pcs./case |

Mat covers for MegaBlock ${ }^{\circledR}$

## Adhesive Sealing Tapes for Bioanalytical Applications

$\square$ Reliable sealing for polypropylene, polystyrene and polycarbonate plates
$\square$ High temperature tolerances to $110^{\circ} \mathrm{C}$ for use in PCR
$\square$ Optically transparent for real-time PCR
$\square$ Ideally suited for the safe compound storage to $-70^{\circ} \mathrm{C}$
$\square$ Effective sealing of highly hygroscopic solutions (e.g. DMSO)
$\square$ Excellent resistance against organic solutions like DMSO, Acetonitril and Methanol
$\square$ Detection level of adhesive residues $<5 \mu \mathrm{~g} / \mathrm{ml}$, Test Solvent DMSO
$\square$ Recommendation for application see p. 74
Tapes for Genomic, HTS, compound storage

| Order Number | Description | Tape material | Packaging |
| :---: | :---: | :---: | :---: |
| 95.1994 | transparent | polyolefin | 100 tapes/inner case |
| 95.1995 | non-transparent | aluminium | 100 tapes/inner case |

Tapes for standard applications (ELISA-plates, sample storage $-40^{\circ} \mathrm{C}$ to $100^{\circ} \mathrm{C}$ )

| 82.1586 | transparent | acetate | 100 tapes/inner case |
| :---: | :---: | :---: | :---: |

* important notes on autoclaving: see p. 163

## Sample Vials

## For the performance of Radio-Immuno-Assay

Effective centrifugation of $4 \times 96$ or $6 \times 96$ vials using microtest plate adapterFirm adherence of sediment during second antibody separationSuitable for alternative separation techniques, for example the magnetic separation of iron oxide coupled antibodiesThe shape is compatible with most common Gamma countersMinimal waste volume - economical disposal| Order Number | Vial/Accessories | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |

## Round Mailing Containers

## The safe and practical mailing container for diagnostic specimens

The mailing containers are suited for transport of diagnostic samples. Leakproof at a pressure difference of 0.95 bar they are optimal for use as secondary containers in compliance with the P 650 Packaging Instruction. The mailing container and screw cap are made from environmentally neutral polypropylene and are autoclavable up to $121^{\circ} \mathrm{C}$ (important notes on autoclaving: see p. 163). Customer-specific, non-abrasive print is available on request (minimum quantity: 5,000 pcs.). The mailing containers are supplied with and without absorbent liner. Absorbent liners can be ordered separately.
As provided in the P 650 Packaging Instructions, the space between the primary receptacle and the second container must always contain absorbent material.
The $\varnothing 30 \mathrm{~mm}$ containers fit all common letter boxes with a 35 mm slot.

## Important:

Containers and screw caps must be ordered separately! Container $114 \times \varnothing 44 \mathrm{~mm}$ is suitable for mailing common culture medium carriers (e.g. Uricult system). Container $126 \times \varnothing 30 \mathrm{~mm}$ with special cap no. 65.731 is for mailing Port-A-Cul tubes.

## Mailing containers - Examples of suitable sample tubes

For sample tubes $\varnothing 16.5$ and $\varnothing 25 \mathrm{~mm}$ the screw cap can also be used as a support base.

Suitable Boxes and mailing envelopes see pages 121-123.

## Square Mailing Containers

## For safe postage and transportation of clinical samples

Sarstedt mailing containers have proved to be safe for blood, urine, swab and faeces sample tubes.

A tight screw cap ensures safe and easy opening and closing of each container. The square design allows the products to be packed easily without wasting space. Container and cap from HD-PE neutral.
Containers are also available with absorbent liner.
One side of each container can be printed to customer requirements. Minimum order quantity: 5,000 .

Mailing container $114 \times 28 \mathrm{~mm}$ with screw cap

## Mailing Containers

Example thawing graph
Sample: tube filled with 10 ml water, deep-frozen
Measuring: temperature probe in sample
Freezing temperature: $-12^{\circ} \mathrm{C}$
Surrounding temperature when thawing: $18^{\circ} \mathrm{C}-21^{\circ} \mathrm{C}$

## Cool transport container for frozen specimens

The mailing packaging enables the safe cool transportation of medical and biological samples.

Each mailing container can accommodate two sample tubes of 10 ml volume. It is ideally suited for the 9 ml S-Monovette ${ }^{\oplus}$ or any tube of 16.5 mm diameter and an overall length of max. 107 mm .
The mailing container is filled with a coolant and should be frozen in a horizontal position at least at $-12^{\circ} \mathrm{C}$ before mailing. The temperature in the sample tube is illustrated by the thawing graph shown below.
A Styrofoam casing protects against warmth and possible transit damage.
A private label can be printed onto the container on request.
The cool transport container is not suitable for samples that are not allowed to freeze, as a non-frozen sample would freeze when placed inside the deep-frozen cool transport container.

Complete pack comprising one mailing container with coolant, styrofoam casing and rubber band

## Racks

## Quality racks for all tube options

## S-Monovette ${ }^{\oplus}$ rack

Universal compact block rack
for space-saving and
systematic sample storage.
Choose from 6 different colours
to organize your laboratory.

Rack Series 18 / 20 / 48
A wide range with a variety of diameters. Racks are made from unbreakable,transparent plastic and can be easily disassembled for cleaning.

## Series 48

$4 \times 12$ Apertures
Diameters 8 to 17.2 mm
Series 20
With hood and request form compartment

Series 20
$2 \times 10$ Apertures
Diameters 10.5 to 26 mm

## Series 18

## $3 \times 6$ Apertures

Diameters 8 to 17.2 mm

Our versatile rack range includes more than 60 different options offering optimum solutions for any application required. Whether for S-Monovettes, tubes with a wide selection of different diameters, micro tubes or reaction cups, the Sarstedt range provides multipurpose solutions to suit all requirements. The high-grade, resistant rack material is durable and can be autoclaved. Special features facilitate laboratory work, e.g. notched apertures enable single-handed opening and closing of Sarstedt micro tubes.

## Racks 'Series 18'

3 Rows, with 6 apertures per row

$\square$ From impact-resistant material
$\square$ Autoclavable up to $121^{\circ} \mathrm{C}$, important notes on autoclaving: see page 163

## Dimensions

height - 40 mm
length -137 mm
width -70 mm

## Diameter of aperture (see table below)

## S-Monovette ${ }^{\circledR}$ Rack

The universal block rack for a range of applications
$\square 50$ apertures - 5 rows of 10 apertures each
$\square$ Available in three sizes, suitable for all S-Monovette ${ }^{\circledR}$ diameters and for tubes from $\varnothing 8$ up to $\varnothing 17 \mathrm{~mm}$
$\square$ Various colours enable universal use and help to organise you laboratory
$\square$ Especially suitable for space-saving sample storage
$\square$ Autoclavable up to $121^{\circ} \mathrm{C}$, important notes on autoclaving: see p. 163
$\square$ Marking of each aperture as well as printing possible upon customer request
$\square$ The D13 and D17 rack is also available with handles

Rack with 50 apertures
Rack D12

Rack D13

Rack D17

## Rack D12 without handles

Suitable for S-Monovette ${ }^{\circledR}$ up to $\varnothing 11.0$ mm and tubes up to $\varnothing 12.0 \mathrm{~mm}$.
Dimensions: (length $x$ width $x$ height) without handle: $152 \times 80 \times 45 \mathrm{~mm}$

| Order <br> Number | Colour | Packaging <br> Pcs./Case |
| :--- | :---: | :---: |

| 93.852 .170 | white | without | 20 |

## Double block racks with 100 apertures

Two racks are connected to each other. Especially advantageously for an efficient reserve of samples.
With the mentioned order numbers these racks are only available in grey colour.
Other colours and a special print are available upon request.

Double block racks connected at front ends

| Order <br> Number | Rack Type | Handles | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |
| 93.853 .300 | D 13 | without | 8 |
| 93.852 .300 | D 17 | without | 12 |

Double block racks connected at lateral ends

| Order <br> Number | Rack Type | Handles | Packaging <br> Pcs./Case |
| :---: | :---: | :---: | :---: |
| 93.854 .200 | D 12 | without | 12 |
| 93.853 .200 | D 13 | without | 8 |
| 93.852 .200 | D 17 | without | 16 |
| 93.851 .200 | D 17 | with | 6 |

Dimensions of double block racks
(length x width x height)

## Rack D12 -

Connected at lateral ends:
without handles $152 \times 160 \times 45 \mathrm{~mm}$

## Rack D13 -

Connected at lateral ends:
without handles $180 \times 192 \times 45 \mathrm{~mm}$
Connected at front ends:
without handles $360 \times 96 \times 45 \mathrm{~mm}$

## Rack D17 -

Connected at lateral ends:
without handles $209 \times 218 \times 45 \mathrm{~mm}$
with handles $246 \times 218 \times 45 \mathrm{~mm}$
Connected at front ends:
without handles $418 \times 109 \times 45 \mathrm{~mm}$

## Storage Boxes

Cryo boxes for low temperature range storage to $-196^{\circ} \mathrm{C}$

| 74.5622 .005 | 1,800 ml | $1,800 \mathrm{ml}$ drainage bag for UM 500 | 100 |
| 74.5624 .005 | 3,000 ml | 3,000 ml drainage bag for UM 500 | 100 |
| 74.5763 .010 |  | Replacement strap | 50 |
| 74.5650 .010 |  | Hooks to fit wide bed frames | 150 |

## Rapid draining

Rapid draining of the measuring chamber is ensured by a rotary valve which allows maximum flow rates in line with optimum pressure balancing within the system (bacteria-tight ventilation of drip chamber, measuring chamber and collection bag).

## Precise reading

A clear and comprehensive millilitre graduation facilitates precise registration of even the smallest volumes.

The total measuring volume of 500 ml and the clear graduation permit exact balancing also in cases of high output.

Hygienically safe
The integral drip chamber with bacteria-tight ventilation and anti-reflux membrane valve, plus the additional anti-reflux valve in the collection bag, ensures it to be hygienically safe and prevents retrograde bacterial migration.

## Urine and Secretion Bags

## Urine and Secretion Bags

## Urine and secretion bags with anti-reflux valve

$\square$ Universal step connector
$\square$ Length of transfer tubing 90 cm , inner diameter 5 mm
$\square$ Anti-reflux valve
Tear-off edge for disposal

| Order Number | Volume | Description | Packaging <br> Pcs./Case |

* ethylene-oxide

## Incontinence Management

## Velcro band for attachment of leg bags

High level of comfort
$\square$ Full-width elastic design
$\square$ Comfortable, padded material
$\square 3$ different sizes for individual fit
$\square$ Resistant to wear and washable ( $40^{\circ} \mathrm{C}$ )

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |
| 74.5766 .001 | Size: S $\quad 380-430 \mathrm{~mm}$ | 10 |
| 74.5766 .002 | Size: $\mathbf{M} \quad 440-530 \mathrm{~mm}$ | 10 |
| 74.5766 .003 | Size: $\mathbf{L} \quad 550-650 \mathrm{~mm}$ | 10 |

## UroStretch for safe leg bag attachment

Elastic, textile tubular bandage for leg bag attachment.
For use with all urine leg bags up to 750 ml .
Suitable for multiple use and washable at $40^{\circ} \mathrm{C}$.
UroStretch offers increased user comfort due to:
No contact of leg bag with the skin (to avoid allergies and skin irritation)
$\square$ Full-length fixation of leg bag surface
$\square 4$ different sizes for individual fit
$\square$ Reduction of liquid noise

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |
| 74.5767 .001 | Size: S <br> (lower leg) | yellow colour code |
| 74.5767 .002 | Size: $\mathbf{M}$ blue colour code | 10 |
| 74.5767 .003 | Size: $\mathbf{L}$ brown colour code | 10 |
| 74.5767 .004 | Size: XL green colour code | 10 |

The UroStretch is pulled over the thigh from below so that the coloured band points towards the body.
The red strip should be positioned approximately 5 cm above the knee.
The leg bag is placed on top and the drainage tap is passed through the UroStretch opening in the center of the red strip.

Finally, the outer side of the UroStretch, still resting on the lower leg, is pulled over the leg bag.

## Infusion Instruments

Infusion system Air G for gravity infusion
$\square$ Sealable, bacteria-tight ventilation
$\square$ Large PVC-free drip chamber with flexible base part
$\square 15 \mu \mathrm{~m}$ particle filter
Tube length 150 cm
Precision-V-roll clampInjection spacerLuer lock connection

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |

## Infusion Filters

## Flat infusion filter for particulate and microbial filtration

## Product features

Hydrophilic $0.2 \mu \mathrm{~m}$ filter membrane for the prevention of

- microbial contamination
- particulate contamination

Hydrophobic $0.02 \mu \mathrm{~m}$ filter membrane for the prevention of

- air bubble infusion
$\square$ Efficient $10 \mathrm{~cm}^{2}$ filtration surface
$\square$ Flow rates of up to $20 \mathrm{ml} / \mathrm{min}$.
$\square$ Position-independent ventilation
$\square$ Can be used with pressure and gravity infusionPressure-stable up to 3.2 bar
$\square$ Economical due to extended use times of up to 96 h without changing the system
Literature on bacteria retention and drug compatibility is available on request

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |
| 74.4335 | ind. wrapped, sterile | 50 |

## Infusion Sets

Infusion Set 1
$\square$ 5-Way valve manifold, colour-coded
$\square 1,600 \mathrm{~mm}$ tubingThree-way stopcock
96 h flat infusion filter $0.2 \mu \mathrm{~m}$
200 mm tubing
2 x three-way stopcock

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |
| 74.4430 | ind. wrapped, sterile | 50 |

## Infusion Set 2

5-Way valve manifold, colour-coded1,600 mm tubing
$\square 96 \mathrm{~h}$ flat infusion filter $0.2 \mu \mathrm{~m}$
$\square 200 \mathrm{~mm}$ tubing
$\square 2 \mathrm{x}$ three-way stopcock

| Order Number | Description | Packaging <br> Pcs./Case |
| :---: | :---: | :---: |
| 74.4431 | ind. wrapped, sterile | 50 |

## Infusion Set 3

$\square 5$-Way valve manifold, colour-coded$1,600 \mathrm{~mm}$ tubing$2 \times$ three-way stopcock96 h flat infusion filter $0.2 \mu \mathrm{~m}$200 mm tubing
$\square$ Three-way stopcock

## Transfusion Medicine

## Latest technology for collecting, processing and transfusing blood products

## Cordless Electronic Tube Stripper

Electronic tube stripper for automatic stripping of all standard blood bag tubing in under 2 seconds.

## Multi-Sealer

Compact, high-frequency instruments for stationary or mobile sealing of blood bag tubing

## MS Segmentation System

Automatic sealing and segmentation of blood bag tubing. Produces 3-7 segments simultaneously.

## Thrombocyte Incubator and Agitator

The ideal solution for the storage of thrombocyte concentrates. The casing is made of stainless steel The agitator trays are additionally coated with plastic. (not shown).

## TOPSWING Blood Mixing and Weighing Device

Blood mixing and weighing device with innovative 3-D blood mixing motion for stationary and mobile blood donation use. The TOPSWING is compatible with a variety of convenient data transfer options: cable, USB card or DECT wireless technology.

## SAHARA Thawing and Warming Systems

Designed for the hygienic and rapid thawing and warming of frozen blood products. The warming is a dry process, i.e. water is not used as the medium of heat transfer.

## SAHARA inline

The SAHARA inline blood and infusion warmer operates on the through-flow principle and is used for inline warming of liquid blood products and infusion solutions during transfusion/infusion preventing or alleviating hypothermia in the patient.

## Consumables for transfusion medicine

Our extensive range of ancillary products includes high-quality consumables for transfusion medicine:

Blood bag systems for autologous blood collection

- Sealing plugs for blood bag tubes
- RedTag radiation indicators
- Cartons for blood component storage
- Labels for autologous blood products

Please ask for our detailed brochure containing further information.

## Anaesthesia

## For regional anaesthesia and pain therapy

Epidural anaesthesia and CSE
The REGANESTH ${ }^{\circledR}$ product range includes epidural needles, epidural catheters and catheter sets for all epidural anaesthesia requirements. Each set includes easy-to-use LOR syringe.

For a safe CSE, the REGANESTH ${ }^{\circledR}$ Tuohy needle may be combined with an appropriate REGANESTH ${ }^{\circledR}$ spinal needle.

## Spinal anaesthesia

For regional anaesthesia close to the spinal column, thin REGANESTH ${ }^{\circledR}$ needles with pencil-point tips in various lengths are available.

An anatomically molded REGANESTH ${ }^{\circledR}$ grip with viewing chamber is of particular benefit.

## Plexus anaesthesia

The range of products for regional anaesthesia away from the spinal column includes both unipolar stimulation needles for the single-shot technique and the compatible connections for electrical nerve stimulation.

Catheter sets for long-term pain therapy complete the range of plexus anaesthesia products.

## Sample Preparation

## Decapping - Sorting - Aliquoting - Labeling - Recapping

Decapper DC 1200
Recapper RC 1200

Mechanical De- and Recapping of sample tubes

Minimizes the risk of a repetitive motion injury or accidental exposureHigh throughput of up to 1,200 tubes per hourEasy operationAccomodates a variety of tube types in mixed operationSample relocation for the decapping process is avoidedAccomodates most linear analyser racks

Sample Sorting System HSS
Identification - Opening - Sorting

The direct route to the analyser

The high speed sample sorting system HSS has specifically been developed for the rapid automatic pre-sorting of sample tubes. The modular concept allows customised design for individual lab requirements (via a loading platform). Tubes with push-caps or screwcaps are fed into the system. It accommodates most types of centrifuge- or analyser specific carriers.
ID module reads bar code and senses tube type via height and cap colour. Error samples are sorted to dedicated area for manual processing.
Depending on order inquiry, tubes are decapped and sorted to analy-ser-, generic-, or archive racks.
Archive tubes may be automatically recapped.

## Sarstedt P.O.S. 720

## Petri Dish Sorting and Labeling System

$\square$ Genuine progress in the automation of bacteriology with 720 plates per hour
$\square$ Automatic labeling with barcode and alphanumeric text
$\square$ Reliable supply of all required dishes for test requests
$\square$ Sorting of dishes according to location
$\square$ Extensive configuration flexibility for individual adaptation to various laboratory processes
$\square$ Provision of labels for agar in tubes and other vessels

## Sample Preparation

## Decapping - Sorting - Aliquoting - Labeling - Recapping

## Sample Distribution System PVS <br> Identification - Decapping - Sorting - Aliquoting - Recapping

Independent from equipment with analysers the open architecture and the modular design of the sample distribution system PVS enables simple integration into an existing laboratory organisation.
Sample tubes (serum, whole blood, urine) are loaded in whatever carriers, e.g. centrifuge inserts and sorted into any analyser racks or archive trays. The clone module produces aliquots in bar coded secondary tubes according to test requests from LIS. Changing parameters is simple. Intelligent distribution strategies meet any requirement.High throughputRack- or Puck trackLoading in any carrier type e.g. centrifuge inserts, analyser or generic racksSample registration via bar codeDetection of tube geometry and cap colourPrecise volume managementQuality detection
(under development)Multiple tubes can be processedProduction of any number of aliquots in bar coded secondary tubesClot detectionSorting into any analyser rack typesError samples are detected and sorted to dedicated area
$\square$ Recapping for archive

## Electrophoresis

## Electrophoresis on cellulose acetate foil

## Manual electrophoresis with the Elphor electrophoresis system

The Elphor ${ }^{\circledR}$ electrophoresis system is designed for manual serum protein electrophoresis on cellulose acetate foil and for a variety of standardized electrophoresis operations on agarose gels.

The system consists of the Elphor ${ }^{\circledR}$ electrophoresis chamber and electrode set with accessories.

## Automatic evaluation with the Elphormat 5 densitometer

Connected to a PC, the Elphormat 5 densitometer automatically evaluates up to 30 samples in one operation. The transmitted light method is used for all measurements.

## Fully automatic electrophoresis on cellulose acetate foil

The fully automatic ELPHOSCAN MINI Plus and ES2000 Plus instruments are proven systems for small and large sample throughputs and for conducting serum, urine and liquor electrophoreses.
The extensive CAF software (Windows PC) reliably controls and supports manual sample preparation on the serum pallet pipetting asisstant, the complete electrophoresis process and result processing with patients and data management and other useful functions.

- Quality control in conformity with RiLi-BÄK
- Comprehensive software to meet many requirements
- Choice of print-out formats

■ Bi-directional RS232 interface

- LAN connection
- Data storage on the PC hard disk
- Maintenance and test programmes

## Consumables for electrophoresis

Our extensive range of ancillary high-quality consumables for various manual and automatic electrophoresis systems includes:

Environmentally friendly reagents

- Control sera
- Cellulose acetate foils
- Dispocards / Seracards
- Filter papers

Glass slides

- Recording paper
- Styluses

Please ask for our detailed brochure containing further information.

## Thin-layer Chromatography

## Solutions for routine workloads in chemical analysis

Thin-layer chromatography is essential for the analysis of mixed substances, particularly of drugs of plant origin. Sarstedt provides instrumentation for each step of the analysis process.

## Sample application

## HPTLC Applicator AS 30

The HPTLC Applicator AS 30 works using the 'spray-on' technique in which a stream of gas applies the sample to the HPTLC plate. A sample applicator specially modified for Sarstedt extends the AS 30 to a fully automatic application system. The integrated software enables the method parameters to be entered via a PC in a simple-to-read dialog window.

## Chromatography development

Sarstedt provides horizontal and vertical separating chambers in glass or Teflon for all standard plate formats from $50 \times 50 \mathrm{~mm}$ to $200 \times 200 \mathrm{~mm}$. A fully automatic development chamber provides a protective environment for chromatography in programmed conditions, with or without chamber saturation.

## Derivatisation

ChromaJet DS 20
With the ChromaJet DS 20, reagents can be sprayed with maximum precision on thin-layer plates for foils under computer or microprocessor controlled conditions. A minimal reagent amount is required, and a homogenous distribution of the spray medium is assured. A transparent protective cover provides clear visibility during spraying and prevents the escape of aerosols.

## Documentation

## Digital image processing

High-resolution digital cameras with special lenses deliver detailed, images with exemplary color brillance at resolutions of up to 7 million image elements. The ProViDoc ${ }^{\circledR}$ documentation program ensures GxP-compliant processing and problem-free image storage.

## Evaluation <br> Classic densitometry

Under PC-controlled conditions, absorption and fluorescence are measured during transmission and remission. The useful spectral range measures 190 to 900 nm , and the monochromator, lamps and filters can be changed automatically. These features combined with the ProQuant computer program enable a wide variety of application options, and make processing and data management convenient, safe and GxP-compliant.

## Certification

## Our Philosophy: <br> Quality Management without Compromise

## Properties of Plastics

## Disposal and the environment

## The plastics used for our products are environmentally neutral during disposal.

The plastics can be stored on waste disposal sites without any problems as they do not give off any harmful substances to air, ground or water.

The disposal in waste incineration plants does not yield any harmful emissions.
The plastics PS, PP and PE are valuable energy carriers to maintain incinerator temperature, the more plastics in waste, the less use of fuel.

|  | Polystyrene | Polypropylene | Polyethylene |
| :---: | :---: | :---: | :---: |
| Abbreviation | PS | PP | HD-PE High Density LD-PE Low Density |
| Optical features | transparent, bright surface 90\% light permeability (with 400-800 nm) | translucent, bright surface | translucent to opaque, wax-like surface |
| General mechanical properties | high breaking strength and heat resistance, excellent electrical insulating features, not suitable for high centrifugal forces | high breaking strength, insensitive to tension cracks, high rigidity | relatively low breaking strength and surface hardness, high viscosity, soft to rigid, sensitive to tension cracks, waterrepellent |
| Autoclaving | not suitable | Products made from PP can be autoclaved up to $121^{\circ} \mathrm{C}$ without significantly impairing their mechanical properties. Users are to test for themselves if autoclaving may have any effect on other characteristic product features so as to influence the individual application concerned. | not suitable |
| Max. usage temperature*1 | $60-70^{\circ} \mathrm{C}$ | $100-110^{\circ} \mathrm{C}$ | HD-PE $70-80^{\circ} \mathrm{C}$ <br> LD-PE 60-75º |
| Short-term max. usage temperature*1 | $75-80^{\circ} \mathrm{C}$ | $120-140^{\circ} \mathrm{C}$ | HD-PE 90-120 ${ }^{\circ} \mathrm{C}$ <br> LD -PE $80-90^{\circ} \mathrm{C}$ |
| Suitable for application in temperature ranges below zero*2 | not suitable | suitable for limited applications*1 | suitable for limited applications*1 |

| Flammability | inflammable | inflammable | inflammable |
| Ignition temperature*1 | $300-400^{\circ} \mathrm{C}$ | $300-360^{\circ} \mathrm{C}$ | $350-360^{\circ} \mathrm{C}$ |
| Humidity absorption | < 0.1\% | < 0.1\% | < 0.1\% |
| General chemical resistance | PS is resistant to salt solutions, leaching solutions, non-oxidising acids as well as alkalis and alcohol. Fuel, etheric oils, strong oxidising agents and aromatic substances lead to the formation of cracks in PS. | PP is resistant to aqueous solutions of inorganic salts, acids, organic solvents up to $60^{\circ} \mathrm{C}$. Alcohols, esters and ketones do not 'attack' PP either. <br> Aromatic and halogenised carbon dioxides, oxidising substances such as concentrated nitric acid and with higher temperature fat, oil and wax make PP swell. | PE is highly resistant to chemicals. The chemical resistance of HD-PE is generally higher than that of LD-PE. Aqueous solutions, leaching solutions, alcohol, oil as well as water and salt solutions do not 'attack' PE. Concentrated, oxidising acids such as nitric acid and halogens have a decomposing effect. |
| Disposal | PS is a pure hydrocarbon compound and thus environmentally neutral during disposal. Incineration does not yield any harmful substances. | PP is a pure hydrocarbon compound and thus environmentally neutral during disposal. Incineration does not yield any harmful substances. | PE is a pure hydrocarbon compound and thus environmentally neutral during disposal. Incineration does not yield any harmful substances. |

[^16]
## CryoPure Storage System

## Safety Instructions and User Guide

## Caution

For safety reasons, CryoPure tubes must always be stored in the gas phase of liquid nitrogen.
During the freezing process, a vacuum is created inside the tubes. The strength of the vacuum is dependent upon the filling volume (freezing volume). When CryoPure tubes are stored in liquid nitrogen, liquid nitrogen may enter the tubes in proportion to the vacuum inside. During removal and/or thawing of the tubes the liquid nitrogen changes into the gas phase and causes an internal pressure to build. As a result, infectious material may be released or the tubes may explode. Contaminated nitrogen entering the tubes may also harm the cellular components of the sample.

Always observe appropriate safety precautions when working with CryoPure tubes:

- Store tubes in the gas phase only.
- Fill the tubes to the fill mark.
- Apply screw cap handtight. Do not over-tighten or use any tool.
- Wear protective clothing, face protection, glasses and gloves.
- Place tubes into a container (e.g. water bath) with cover during the thawing process.

Please also observe your institutional safety guidelines!

## Standard Protocol for Freezing Mammalian Cells

- Rinse cells with PBS.
- Remove cells with suitable method depending on the cell type (e.g. treatment of cell layer with EDTA-, Trypsin- or EDTA-Trypsin solution).
- Stop reaction with cell culture medium containing serum.
- Count cells by means of Neubauer cell chamber.
- Centrifuge cells ( $5 \mathrm{~min}, 350 \mathrm{xg}$, room temperature), discard supernatant.
- Re-suspend the cell pellet in a culture medium containing serum in order to render a final cell concentration of approx. $10^{7}$ cells $/ \mathrm{ml}$.
- Add 1 volume of double-concentrated freezing medium (e.g. $50 \%$ medium, $30 \%$ FCS, $20 \%$ DMSO). The number of cells should be at least $5 \times 10^{6} \mathrm{cells} / \mathrm{ml}$.
- Fill CryoPure tubes to fill mark.
- Freeze samples in an insulating container at $-80^{\circ} \mathrm{C}$ that ensures a cooling rate of $1^{\circ} \mathrm{C} / \mathrm{min}$. Cells should be stored at $-80^{\circ} \mathrm{C}$ for at least 6 hours. Depending on the cell type, cells may also be viable for several days at $-80^{\circ} \mathrm{C}$.
- Transfer the tubes to a liquid nitrogen tank.

## Standard Thawing Protocol

- Quickly remove the CryoPure tubes from the liquid nitrogen freezer and place into a $37^{\circ} \mathrm{C}$ water bath with cover.
- After thawing, briefly disinfect the tubes with $70 \%$ alcohol. Dry and transfer the cell suspension into a 15 ml centrifuge tube (e.g. Order No. 62.554.002).
- Add culture medium and centrifuge cells ( 350 xg at room temperature for 5 minutes).
- Discard the supernatant and re-suspend cells in a suitable fresh culture medium.
- Transfer to a cell culture vessel and incubate.

## Chemical Resistance

The following table is to serve as a general guideline. The factors given are non-binding recommendations taken from details rendered by plastic manufacturers and from literature. As a matter of principle, it is the user's responsibility to check the resistance of the plastic material under the specific test conditions concerned, including though not limited to applications where any mixtures of chemical substances and modified temperatures are involved.

The first letter refers to the conditions at $+20^{\circ} \mathrm{C}$, the second to conditions at $+60^{\circ} \mathrm{C}$.

## General Information

This Catalogue may contain information and illustrations of products that may not be available in particular countries. If mandatory, such products, prior to distribution, must be approved by the competent regulatory body in the individual countries concerned to receive market clearance. None of the information and illustrations contained shall be construed as a solicitation or promotion for any product and/or use of any product which is not authorized by the laws and regulations of the country where the user resides.

This Catalogue is general in nature and provided for information purposes only. Any medical, health-related and technological statements are not meant to be a substitute for medical, scientific or technological advice.

Unless expressly indicated to have a binding effect, the information, drawings, illustrations, technical, dimensional and performance specifications provided in this Catalogue are approximate only. We expressly reserve the right to carry out technical modifications.

Our General Conditions of Sale are available on request.

[^0]:    * = manufactured to order only

[^1]:    Separate insert plates for Safety-Tray (version I to IV) are available on request.

[^2]:    $\mathrm{PS}=$ polystyrene transparent, $\mathrm{PP}=$ polypropylene

[^3]:    PS = polystyrene, transparent, PP = polypropylene, LD-PE = Low Density polyethylene
    O०० = StackPack

    * caps are shown on pp. 57-58
    *2 Cap 65.725 is only suitable for $100 \times 16$ tubes from PP and not for tubes from PS.

[^4]:    * Do not seal the cap tightly when autoclaving; PP = polypropylene, HD-PE = High Density polyethylene

[^5]:    PS = polystyrene, transparent, PP = polypropylene, HD-PE = High Density polyethylene

[^6]:    *For technical reasons available without print only.

[^7]:    PP = polypropylene, LD-PE = Low Density polyethylene

[^8]:    PP = polypropylene, LD-PE = Low Density polyethylene

[^9]:    Biosphere ${ }^{\circledR}$ quality (sterile) on page 71.

[^10]:    LD-PE = Low Density polyethylene
    Different sizes of sterile wrapped transfer pipettes are available on request.

[^11]:    PS = polystyrene, transparent, PMMA = polymethylmethacrylate

[^12]:    PP = polypropylene, PS = polystyrene, HD-PE = polyethylene High Density, PVC = polyvinylchloride

[^13]:    Other colours are available on request. Printing of the front/long side with a special print is possible as of a minimum order quantity of 100 pieces (front side print is not possible for the model with handles).

[^14]:    *Important notes on autoclaving: see p. 163

[^15]:    ethylene-oxide

[^16]:    ${ }^{\text {*1 }}$ Suitability depending on the plastic material and the nature of load applied.
    *2 Caution: Plastics start to become brittle at temperatures below zero. The suitability of products intended for use in these temperature ranges should be tested prior to application. These notes serve as a guideline only and do not constitute any confirmation of warranted quality.
