Menntor X7
Modular Patient Monitor

> **Features & Benefits**

- Multi Parameter plug in Module for all basic Vital Signs
- The Multi Parameter Module (MPM) is also a Transport Monitor
- MPM provides continuity of patient data even during transport.
- Convenient for use in transfer between hospital units
- Long-term data storage:
  ◊ Graphic Trend
  ◊ Numeric Charts
  ◊ ECG & Vital Signs Waveform Full Disclosure
- LAN connectivity
- Wireless LAN Option
- MenneNet – Bed to bed communication and Interface to Nurse Central Station
- Connectivity with Medical IT Systems
- Easily customizable for optimal clinical use
- Demo Mode
- User friendly, intuitive interface, including easy access "Quick Keys"
- Special features - CRG, Alarm Watch, CerebraLogik - Dual Channel EEG & aEEG
- Multiple Interface Options - Ventilators, Anesthesia machine, Anesthetic Gases, PiCCO, Vigilance/Vigileo, Radical 7, BIS, NMT.
- Customizing Tools - Monitor Profile, Software Quickeys, Permission Editor.

mennen medical
since 1963

Applications:

Combined Modular Patient Monitor and Transport Monitor
Transfer from bed side to transport without disconnection of patient cables and sensors
Working successfully in all Hospital units and transport, including:
- Emergency Room
- Trauma Unit
- Neonatal ICU
- Respiratory ICU
- Operating Room & Recovery
- Cardiac ICU

CE 0473 **RoHS**

Menntor X7
Modular Patient Monitor

The Menntor X7 is a Modular Patient Monitor, with a 15" flat screen display and more than 3 hours battery backup. It has an extensive storage capability of Full Disclosure, Charts, Trends and Event Strips.

The Multi-Parameter Module (MX57) serves as a front end for vital signs acquisition while connected to the Menntor X7 host, and serves as a transport monitor with 5.7" display when is taken out of the Menntor X7.

All the data collected during transport can be imported to the host monitor to provide continuity of patient data.

> Monitor Configuration and Options

Menntor X7 is a 15", vital signs modular monitor.
- Optional Built-in recorder
- Optional Touch screen
- Line operated with 3 hours (optional 6 hours) battery backup
- Bed to Bed and Central station data transfer via wired or wireless (optional) Local Area Network

> Modules

- MX57 – MPM - Multi Parameter plug in Module MX57 with optional 5.7" display
  Automatic Landsacape (horizontal) or Portrait (vertical) vital signs view.
  The MPM is equipped with battery and optional display of vital signs Data and Waveforms

  MPM Vital Signs
  ◊ 3/5 / 12 lead ECG,
  ◊ Respiration,
  ◊ SpO2 (Nellcor),
  ◊ NIBP
  ◊ 2 Temperatures
  ◊ 2 Invasive Blood pressure channels (Optional 4)
  ◊ Cardiac output (thermo-dilution)

- EtCO2 Microstream Module
- Spirometry – Pulmonary Mechanics Module

> Menntor X7 Display Modes

Vital Signs and waveform display

Very Big Number display

Remote Bed View and Alarm Watch

Vital signs chart with up to one minute resolution

Full Disclosure of ECG waveforms 10 second display

CerebraLogik aEEG Display

> MX57 - MPM Display Modes

Landscape Big Number View

Portrait Linear Waveform View

During transport the display characteristics will change according to the position of the MX57 Module
