# DoVera
## Surgical Light

**SKYTRON**®
Reliability · Versatility · Cost Savings

**Suited for any surgical application, Skytron's DoVera DM520 provides superior illumination while eliminating glare.**

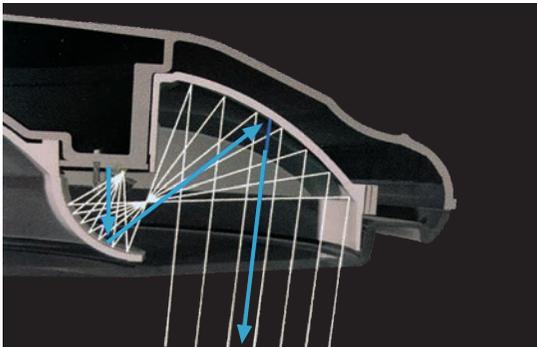

## Double Reflection/No Glare

DoVera's unique Double Reflection technology eliminates glare at the lighthead and provides uniform light across the surgical field. High intensity LED light beams project onto a segmented mirror, which reflects the light onto a smooth second mirror and subsequently to the surgical field. Double Reflection eliminates glare produced by traditional direct lighting technologies.

## Personalized Lighting

**Spot size and Color Temperature** — Capacitive touch control at the yoke allow for easy, personalized set up of the light. Three spot sizes provide the right amount of light for every procedure while the seven color temperature options create a range of options from soft to bright white light. The surgical team can adjust the intensity to their preference throughout the procedure via the sterile center handle. Optional wall control available for adjustments outside of the field.
 Double reflection technology

 No glare

 Personalized lighting

**Intuitive controls on the yoke provide quick personalization of spot size, color temperature, and intensity.**

### Courtesy Light
Safety lighting for darkened surgical suites

### Single Yoke
Easy positioning for low ceiling heights

### Optional Wall Control
Non-sterile option for lighting adjustments

### Double Yoke
Maximum positioning versatility
