Innovative Operative Solutions for Patient Positioning

Enhancing outcomes for patients and their caregivers:

We Enhance Outcomes For Patients And Their Caregivers

Hill-Rom[®]

Enhancing outcomes for patients and their caregivers[®].

Allen[®]

Innovative operative solutions for patient positioning.

Aspen
Surgical[®]

Enhancing patient and caregiver safety in the operating room.

Trumpf
Medical[™]

Innovative solutions for enhanced safety and optimized workflow in the operating room.

WelchAllyn[®]

Smarter tools to assess, diagnose and treat patients with confidence.

Liko[®]

Protecting patients while mobilizing earlier and often.

In the operating room, we partner with you to provide safer and more efficient surgical care.

 **Safety**

Patient and staff safety go together in the OR. Hill-Rom products are designed to help prevent:

- Pressure-related injuries in the OR
- Ergonomic injuries
- Sharps injuries
- Wrong-site surgery

The percentage of hospital-acquired pressure ulcers that occur in surgical patients.¹

The increase in sharps injury rates in surgical settings since 2000.²

The approximate number of wrong site errors that occur per week in surgery in the US.³

✓ Efficiency

The average hospital's revenue generated in the operating room.⁴

The total hospital costs from the operating room.⁴

Hill-Rom provides a convergence of surgical technologies that provide efficient and safe OR utilization:

- Increase flexibility in scheduling and efficient turnover
- Treat an expanded population through multiple product configurations and bariatric offerings
- Perform procedures of different types and complexity

About Allen Medical

Innovative Operative Solutions for Patient Positioning

As an industry leader in patient positioning, our passion is improving patient outcomes and caregiver safety while enhancing efficiency. Our inspiration comes from providing innovative solutions to address our customers' most pressing needs. We immerse ourselves in our customers' world to better address the needs and the daily challenges of their environment. While developing solutions to address patient positioning challenges, or creating systems to offer safe and effective surgical site access for the surgical team, we are committed to providing products of exceptional value and quality.

Allen Spine

Spine Surgery Patient Positioning Systems, Backward Compatible, Future-Proofed & Unique

Uniquely Featured Premium Solutions

Allen® Advance Table *See page 13*

Allen's premium solution for complex spine surgical procedures. Designed with safety and maximum OR efficiency in mind, the Allen Advance Table offers pin or pinless options (*See page 18*) for the attachment of the patient platforms. Convenience features include a modern and intuitive user interface, central locking casters and a multi-control pendant. In addition, the Advance Table pin version can be used in conjunction with our new Lateral to Prone (L2P™) Platform (*See page 20*), which allows for simple and convenient repositioning of the patient from the Lateral to the Prone position without the need to move the patient to a new table.

Service You Can Count On

A Company You Can Trust... *See page 22*

Let us take care of your Allen® Advance Table with our nationwide network of service centers. As a company, we understand that our role is to provide services and equipment that are flexible enough to meet the needs of your patients, while assisting you in controlling and reducing cost.

Table Extensions

Allen Spine System *See page 27*

An innovative OR table extension that turns your standard OR table into a table capable of positioning patients for complex spine surgical procedures at a fraction of the price of a stand-alone spine table. It also offers the added advantage of saving space, storing in less than 6 sq ft (0.5 sq m).

Table Top Attachments

See pages 33 - 39

Allen offers innovative table attachments for spine surgery that are compatible with standard OR tables, Allen Advance Table, Allen Flex Frame, or Mizuho OSI Modular Table System*.

*Compatible with rails that are 1.25" (3.2 cm) wide x 1.5" (3.8 cm) tall with a 14.5" (36.8 cm) space between.

Premium Solutions: Unique, Backward Compatible and Future-Proofed

Unique Features: One Base, Multiple Options

180° Patient Rotation

90° Patient Rotation

One Base: Pinned and/or Pinless

Highly Compatible: Maximizing Investments

- ✓ Detailed service manual sent with every table
- ✓ Immediate response
- ✓ 1,000,000+ product deliveries and removals performed annually

See page 22 for more information on service.

Upon realizing that we had a problem moving our Allen Advance Table, we contacted our local Allen Sales Rep. He noticed that the table wouldn't roll due to a broken or stuck caster. He was unable to move the table as well so he immediately called Allen Medical. Allen in turn contacted Hill-Rom Service to set up a service call. A Hill-Rom Service Tech was on-site in a day and repaired what happened to be a broken caster. We were very pleased with the service provided by our Sales Rep, Allen Medical and Hill-Rom Service.

Modern Intuitive User Interface

EZ-Roll, Centrally Locking Casters

Safety
Designed In...

Allen® Advance Table

A Premium Solution For Complex Spine Surgical Procedures Designed With Improved Safety Features

The Allen Advance Table is designed with a new safety feature to ensure that if the pin that connects the “H-Bracket” to the table base is accidentally pulled out, the patient support top will not fall to the floor. In addition, this solution offers a modern and intuitive user interface with convenience features such as central locking casters — all at a desirable cost.

- Modern user interface helps the user understand the “state” that the table is currently in e.g. locked, unlocked, tilted, trend or reverse trend.
- Central locking casters controlled directly from the pendant.
- EZ-Roll casters help the caregiver when transporting the table around the OR.
- Numbered H-Brackets help with communication between caregivers when attaching the different tops to the base.
- 180° and 90° rotation capabilities.
- Patient weight capacity:
Allen Advance Table: 600 lbs (272 kg)
Advance Table L2P™ Platform: 400 lbs (181 kg)

- Innovative “H-Bracket” design ensures that if the pin connecting the H-Bracket to the table base is accidentally pulled, the patient support top will not fall to the floor.

Advance Table Package #A-71001*

The Advance Table Standard Package includes everything you need for standard prone and supine spine surgical positioning. The package also includes a convenient rolling accessory cart so you can store your tops, rails, supports, etc. all in one place. If you wish to upgrade your table for special positioning needs, we offer a Premium and a Complete Package with additional accessories included. *See page 17*

Advance Prone Support Set #A-71300

Included With All Advance Table Packages

The Advance Table Prone Support Set is a comprehensive patient support system for the prone position. Although it was developed with the Allen® Advance Table, this prone support system is also compatible with the Allen Flex Frame and the Mizuho OSI Modular Table System*. The hip pads have been developed in several sizes to help accommodate different patient shapes and sizes. In addition, the chest, hip and thigh support pads are constructed using a patented multi-layer foam construction similar to that of the popular Allen Wingsets, which is designed to aid in reducing sheer pressures on the skin.

Advance Premium Package Upgrade

#A-71002

#A-70700
C-Flex Head Positioning System
1 Included

Upgrade your Advance Table to the Premium Package with the addition of the C-Flex® Head Positioning System.

The C-Flex Head Positioning System can be used in all types of spine surgery including posterior cervical surgery that utilizes skull clamps with pins. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs and lateral procedures.

See page 37 for more information on the C-Flex Head Positioning System

Advance Complete Package Upgrade

#A-71003

#A-70700
C-Flex Head Positioning System
1 Included

Upgrade your Advance Table to the Complete Package with the addition of both the C-Flex Head Positioning System and the Allen® Bow® Frame.

The C-Flex Head Positioning System can be used in all types of spine surgery including posterior cervical surgery that utilizes skull clamps with pins. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs and lateral procedures.

See page 37 for more information on the C-Flex Head Positioning System

#A-70800
Allen Bow Frame
1 Included

The Bow Frame’s shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient’s abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports.

See page 33 for more information on the Allen Bow Frame

Advance Table H-Brackets: Pin & Pinless Options

Allen now offers pin and pinless options meeting the variation in customer preferences.

Allen® Advance Table With Pin Set-Up

The Advance Standard H-Bracket design ensures that if the pin connecting the H-Bracket to the table base is accidentally pulled, the patient support top will not fall to the floor.

The Advance Standard H-Bracket offers a simple, traditional and intuitive connection system for patient support tops. The innovative connection system ensures that if the pin connecting the H-Bracket to the table base is accidentally pulled, the patient support top will not fall to the floor.

- Numbered H-Brackets help with communication between caregivers when attaching different tops to the base
- Safe & simple pin insertion
- Easily accessible pin storage on column of base

Advance Table Standard H-Bracket #A-71402

What's Optional

#A-71404
Cervical Traction Bar
For use with Pin Set-up

#A-71417
Cervical Traction Device
For use with Pin and
Pinless Set-up

Allen® Advance Table With Pinless Set-Up

The innovative Pinless H-Bracket design maintains the safety offered in our pin design, but eliminates the extra steps of utilizing the cross-pins for securing the patient support top to the Allen Advance Table base.

The innovative Advance Pinless H-Bracket option combines safety with an easy to use table-to-base attachment system.

- Secure and controlled movement of the patient
- Attachment of patient support tops to base without the use of cross pins
- Backward compatible with all Allen Advance Tables

Advance Table Pinless H-Bracket #A-71416 €

Pinless Packages

#A-71414 Set of 4 Pinless H-Brackets & 1 Cervical Traction Device

Cervical Traction Device #A-71417

Not compatible with the Advance Table L2P™ Platform.

Advance Table L2P™ Platform #A-71700 c€

The Advance Table L2P Platform can be used with the Allen® Advance Table* to provide a flexing, lateral surgical patient support platform. The accessories in this set allow a lateral patient to be rotated directly onto the prone supports via the manual rotation capabilities of the Allen Advance Table.*

- Utilize the Allen Advance Table for lateral procedures*
- Create patient flex to open the surgical space
- Single support pad to help reduce shear when flexing
- Integrated air bladder for additional patient flex
- Locks at 90° intervals*
- Works for left or right side lateral approaches
- Eliminates the need to log roll into prone position
- C-arm and O-arm access
- Compatible with standard Advance Rail Top
- Patient Weight Capacity: 400 lbs (181 kg)

*Only compatible with tables with auxiliary power port. For tables without auxiliary power port, please check with your Allen Representative or call Customer Service to confirm compatibility.

Allen® Spine System

An Innovative Table Extension That Turns Your Existing Standard OR Table Into A Spine Table For Complex Spine Surgical Procedures

The Allen Spine System is an extension for your standard OR table that enables you to perform spine surgery with the positioning benefits of a stand-alone spine table such as the Allen Advance Table. In addition, it offers intraoperative lumbar flex and a small storage footprint. The advanced accessories adjust to fit the individual patient's anatomy.

- Intraoperative Flex: Use the power of the table to flex and reposition the patient
- Radiolucent Extension 48" x 17" (1220 mm x 430 mm): Provides excellent C-arm and O-arm access
- Optimized Pressure Management: Chest, hip and head supports
- Versatile: Prone, lateral and supine positioning
- Range of Motion: Provides 20° lateral tilt, trend and flex powered by the OR table
- Height: 25" - 38" (635 mm - 965 mm)
- Fits OR tables with outside rail width 20" - 24" (510 mm - 610 mm)
- Lateral Package available *See page 29*
- Patient Weight Capacity: 500 lbs (227 kg)
- Saves Space: Stores in less than 6 sq ft (0.5 sq m) and accessories can be stored on the frame

Spine System Packages

The Allen® Spine System includes everything below. You also have the choice of an appropriate head positioner based on your surgical needs:

- Choose the C-Flex® Head Positioning System Package #A-70002 if you require an advanced head positioner with simple “squeeze and position” technology that can be used to position the head for all types of spine surgery, including posterior cervical surgeries that require skull clamps and pins.
- Choose the C-Prone Head Positioner Package #A-70000 if you require a standard head positioner that helps position the head quickly and simply for lumbar surgery only.

Scoliosis

Pediatric Patients

Prone And Lateral Positioning

Wingset Body Positioners #A-70200

Supports That Adjust To Fit The Patient

The wingsets are prone patient supports that have been optimized for pressure management and adjustability. These supports accommodate varying patient anatomies.

- Allows abdomen to hang free
- Designed to reduce compression of brachial plexus
- Offers sternal decompression
- Adjustable for barrel-chested, pediatric and scoliosis patients
- Used with shear-reducing, moisture-absorbent comfort cover disposables
- Multi-layer pad design for optimal pressure management
- Accommodates pediatric to adult patients
- Pads adjust to widths of 10" - 18" (254 mm - 457 mm)
- Fits the Allen® Advance Table
- Fits the Allen Flex Frame
- Fits the Mizuho OSI Modular Table System*

Allen® Bow® Frame #A-70800 €€

Versatile - Compatible with Standard OR Tables, Allen Advance Table, Allen Flex Frame Or Mizuho OSI Modular Table System

The Allen Bow Frame is a platform used to perform less complex spine surgeries. The Bow Frame is more versatile than the existing Wilson™ Frame, as the single device attaches to standard OR tables, Allen Advance Table, Allen Flex Frame and the Mizuho OSI Modular Table System*.

Its shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient’s abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports. Every Bow Frame comes with a storage cart. Ideal for use with Laminectomy, Microdisc procedures, Disc procedures, Fusion procedures, Decompressions, and Foraminotomy.

- Fits standard OR tables
- Radiolucent
- Device weight: 28 lbs (12.7 kg)
- Patient supports are adjustable to fit patients of various sizes
- Patient supports adjust laterally up to 7.5" (19 cm) to relieve pressure on the patient’s abdomen
- Patient weight capacity: 500 lbs (227 kg)
- Lightweight for easy set-up
- Compact for easy storage
- Storage cart included for easy transport
- Skin Care Cover disposables are comprised of cosmetic foam

Easy To Set-Up

Works With Standard Wingsets

Proven Pressure Management

Allen® 4-Post System #A-71201, #A-71200

Versatile And Easy To Use: Set Up On Your Standard OR Table Within Minutes

The Allen 4-Post System is a lightweight, versatile platform that attaches to a standard OR table via short or long attachment straps and allows the surgeon to place patients in a prone or lateral spine position. Lordosis, kyphosis and a neutral position of the lumbar spine is now achievable without the use of a large and expensive specialty platform. The 4-Post System is designed to allow the patient's abdomen to hang freely, which may help reduce vena caval pressure. This also offers the ability to place an x-ray plate under the patient and provides unrestricted C-arm access.

Ideal for use with Laminectomies, Discectomies, Osteotomies, Fusions, and other prone and lateral procedures.

- Fits standard OR tables
- Radiolucent
- Weighs under 10 lbs (4.5 kg) without the Wingsets
- Patient weight capacity: 227 kg (500 lbs)
- Skin Care Cover disposable made of cosmetic foam
- Compact for storage
- Lightweight and easy to set-up
- Easy to adjust for different size patients

Just Squeeze And Position

Anterior Access

Kyphotic Patients

Precision Adjustments

C-Flex® Head Positioning System #A-70700 CE

Makes Head Adjustments Easy... Just Squeeze And Position

The modular system can be used to position the head during spine surgery. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs and lateral procedures.

- Cervical flexion / extension
- Lumbar positioning
- Adjust vertically for kyphotic patients
- Lateral positioning
- Device weight: 20 lbs (9 kg)
- 6" (15.2 cm) lateral adjustment range
- 28" (71 cm) height adjustment range
- 9" (23 cm) extension adjustment range
- +/- 15° lateral tilt
- Works with Standard and Radiolucent Skull Clamps and Headrest Systems from DORO® and Mayfield®*
- Includes fold-away mirror
- Easy airway access
- Fits the Allen® Advance Table
- Fits the Allen Flex Frame
- Fits the Mizuho OSI Modular Table System**
- Patient weight capacity: 500 lbs (227 kg)

Artifact-free
Imaging

C-Flex® AP-Vantage System #A-70110, #A-70111

Advanced Table Imaging Capabilities For Your OR Table

The unique product design eliminates obstructions, leaving nothing but the patient in the shot. C-Flex AP-Vantage System provides for high quality cervical images on an OR table.

The system can be used for both anterior and posterior cervical surgeries; it includes an OR table adaptor (with carbon fiber rails) and the C-Flex head positioning system. All the benefits of the C-Flex system for the OR table with a variety of different head attachments.

Ideal for surgical procedures requiring Odontoid Screws, Cervical Fusion or Artificial Cervical Discs.

- Artifact-Free Imaging
- Squeeze and Position with C-Flex
- Easy Precision Adjustments Intraoperatively
- Added Stability with Optional Leg
- Device Weight: 20 lbs (9 kg)
- Works with Standard and Radiolucent Skull Clamps and Horseshoe Headrest from DORO® and Mayfield®*
- Fits OR Tables with Outside Rail Width 20" - 25.5" (508 mm - 648 mm)
- Fits Most Accessory Rail Types (US, EU, UK, Denyer and Japanese)
- Patient Weight Capacity: 500 lbs (227 kg)

Extended Warranty Program For Stirrups - US Only

Keep your stirrups functioning like new for four full years. Purchase the Extended Warranty and Allen® Medical will extend the original warranty for an additional two years (four years total) for stirrup hardware. This program ensures that the stirrup functions properly for four years from the date of purchase. Boot pads are not covered by Extended Warranty programs.

See page 139 for more information on Allen Medical System's Warranty Program.

Ultrafins® Stirrups

Supports up to 800 lbs (363 kg)

Patient Weight Capacity:
800 lbs (363 kg)

Flexible Boot

Clamshell Pad Shown

Ultrafins® Stirrups #O-UFAS

Easily Accommodates Patients With Larger Calves. 800 lbs (363 kg) Patient Weight Capacity.

The Ultrafins Stirrup is an upgrade of the Yellofins® Stirrup. The reinforced rod and joint assembly and the flexible boot make the system capable of positioning a patient weighing up to 800 lbs (363 kg). Though designed for large patients, the Ultrafins Stirrup is still appropriate for use with the general patient population.

- **Patient Weight Capacity: 800 lbs (363 kg):** Support lithotomy positioning for very large patients
- **Flexible Boot:** Boot comfortably conforms to the calf shape of the patient while providing support
 - The shape and design of the back of boot helps reduce pressure under the popliteal fossa
 - Flexible boot allows these stirrups to be standardized throughout the facility
- **Fin Design:** Covers the fibula head and helps to protect superficial peroneal nerve
- **Floating Boot:** Self-adjusting boot minimizes pressure on the calf when moving the stirrup
- **Lift-Assist™ Technology:** Allows easy movement of the leg when placing it in the desired position
- **Ultrafins Clamshell Pad:** Completely encapsulates the foot, ankle and calf for comfortable and secure positioning
- **Squeeze Grip Handle:** Provides easy intraoperative adjustment without compromising the sterile field. Simply release the handle to secure the leg holder in all directions.
- **Lithotomy Range:** Set the stirrup in any position between +84° to -33° lithotomy
- **Abduction Range:** Set the stirrup in any position between +25° to -9° abduction
- **Lithotomy & Length Indicators:** Help ensure precise positioning

Squeeze & Position

Yellofins® Stirrups CE

Simultaneous Lithotomy And Abduction

The Yellofins Stirrup represents the gold standard in lithotomy positioning. Yellofins Stirrups allow for easy adjustment of abduction and lithotomy while maintaining the sterile field. The boot is extended along its lateral side (referred to as a "lateral fin") and is padded on the interior. The purpose of this fin is to cover and protect the head of the fibula and the peroneal nerve. The Yellofins Stirrup enables safe and easy positioning while providing enhanced surgical site access.

- **Boot Design:** Extended lateral fin is designed to cover and protect the head of the fibula and the peroneal nerve
- **Floating Boot:** Self-adjusting boot minimizes pressure on the calf when moving the stirrup
- **Lift-Assist™ Technology:** Allows easy movement of the leg when placing it in the desired position
- **Yellofins Reusable Pad:** Completely encapsulates the foot, ankle and calf for comfortable and secure positioning
- **Squeeze Grip Handle:** Provides easy intraoperative adjustment without compromising the sterile field. Simply release the handle to secure the leg holder in all directions
- **Lithotomy Range:** Yellofins and Yellofins Elite with Lift-Assist technology – Set the stirrup in any position between +84° to –33° lithotomy. Yellofins without Lift-Assist technology – Set the stirrup in any position between +90° to –35° lithotomy.
- **Abduction Range:** Set the stirrup in any position between +25° to –9° abduction
- **Lithotomy & Length Indicators:** Visual indicators that help ensure precise positioning

PAL Pro® Stirrups
Supports up to 350 lbs (159 kg)

Lift-Assist™ Technology

Lithotomy Range: +90° to -22°

FootHugger™ Boot Pad

PAL Pro® Stirrups #A-10052

The Power Of Safety And Control At Your Fingertips

The PAL Pro Stirrup is the most feature-rich Allen® stirrup utilizing a standard boot. The stirrup allows for easy adjustment of abduction and lithotomy while maintaining the sterile field. The PAL Pro stirrup is differentiated from the Yellofins® Stirrup by boot design, mechanism cover, the type of hand control and lithotomy indicator.

- **Floating Boot:** Self-adjusting standard boot minimizes pressure on the calf when moving the stirrup
- **Lift-Assist™ Technology:** Allows easy movement of the leg when placing it in the desired position
- **Handle:** Provides easy intraoperative adjustment without compromising the sterile field. Simply release the handle to secure the leg holder in all directions.
- **Lithotomy Range:** Set the stirrup in any position between +90° to -22° lithotomy
- **Abduction Range:** Set the stirrup in any position between +25° to -9° abduction
- **Lithotomy & Length Indicators:** Visual indicators help ensure precise positioning
- **Mechanism Cover:** Easy to clean the stirrup between cases
- **Patient Weight Capacity:** 350 lbs (159 kg)

Junior PAL® & Little PAL® Pediatric Stirrups CE

Effective, Natural Design Fits Pediatric Anatomy

Easy to use, comfortable and secure leg positioning for pediatric patients. Simultaneous abduction and lithotomy adjustments are easily made via a single handle while maintaining the sterile field. Boot is adjusted with a single clamp making positioning simple.

- **Pediatric Boot Design:** Special boot design to fit pediatric anatomy and cradles the pediatric calf, ankle and heel in a natural position
- **Floating Boot:** Self-adjusting standard boot minimizes pressure on the calf when moving the stirrup
- **Reusable Clamshell Pad:** Completely encapsulates the foot, ankle and calf to help protect, cushion and reduce pressure on these areas
- **Visual Indicators:** Help to ensure precise positioning
- **Lithotomy Range:** Set the stirrup in any position between +90° to -35° lithotomy
- **Abduction Range:** Set the stirrup in any position between +25° to -9° abduction

Allen® Hug-U-Vac® Steep Trend Positioners CE

Ideal For Use With Robotic Procedures

The Allen Hug-U-Vac Steep Trend Positioners safely and comfortably hold patients in the steep Trendelenburg which is common in robotic procedures. The Allen Hug-U-Vac Positioner's unique pliable design enables it to conform to the patient's entire supine anatomy to create a larger surface area to cradle the body during steep Trendelenburg. The Hug-U-Vac Positioners have integral quick-release straps that enable it to attach tightly to the rails of standard OR tables. The Large Hug-U-Vac Steep Trend Positioner has been designed with three chambers to accommodate larger patients.

Ideal for use with Gynecology Procedures, Urology Procedures, Robotic Surgical Procedures, Colorectal Procedures, Cholecystectomies.

- No continuous suction required
- Patient weight capacity: 500 lbs (227 kg)
- Enables secure positioning in robotic procedures
- Designed for easy forearm access to IV lines
- Integral straps secure to standard OR table rails
- Valve location designed for quick access to anesthesia
- Lightweight for easy transport, set-up, and storage
- Durable vacuum valve with on/off switch and lock
- Disposable slipcovers are waterproof for easy clean-up

Easy On, Easy Off

Flexible Band For Increased Site Access

Fully Disposable

All-In-One System

Easy Catcher® Disposable System CE

#O-EC51, #O-EC52

Easy To Use & Fully Disposable Single Use System

The Allen® Easy Catcher is designed to catch and drain fluid during a surgical procedure. It attaches to the side rails of a standard OR table via two integral rail clamps. The Easy Catcher is a single-piece system that contains a fluid drain drape with an integral flexible support band. The band supports the drape vertically for optimal drainage. The support band also flexes to accommodate the doctor's mid-section during procedures. The all-in-one system is fully disposable making it more convenient and quicker to set-up and dispose of.

- All-in-one fluid containment system
- Saves clean-up time
- Fully disposable
- Flexible integrated band
- Easy set-up and removal
- Integral clamps for easy set-up
- Single-piece system includes: buttocks flap, mesh trap, collapsible hose and removable tube adaptor
- Maximize infection control with disposable system
- Attaches to the rails of a standard OR table
- Eliminates the need to clean system band for repeated use
- No more lost or damaged bands
- Removable tube adaptor connects to a variety of fluid waste management systems

Ideal for use with a variety of urology and gynecology procedures including Cystoscopy, Ureteroscopy, Urologic Oncology, Pediatric Urology, Calculi (urinary tract stones) and Neurourology.

Open Mesh

Uro Catcher Drapes #O-UC31, #O-UC32 **CE**

Open mesh filter allows for fast drainage of fluids. The flexible drain hose is compatible with most suction systems for accurate fluid measurement and metering. Velcro® securement eliminates the need to use tape. Durable drape has flexible hose. Length of tubing is 64" (162.5 cm) extended, 20" (50.8 cm) compressed. Tubing diameter is .875" (2.2 cm).

#O-UC31	Sterile Drape (Sold In Case Of 10)
#O-UC32	Non-Sterile Drape (Sold In Case Of 10)

Ultra-Fine Mesh

Brachytherapy Drapes for Uro Catcher System

#A-50008 **CE**

Our ultra-fine mesh trap is designed to catch even very small particles while allowing fluid to drain through. The flexible drain hose is compatible with all suction systems for accurate fluid measurement and metering. Velcro securement eliminates the need to use tape. Durable drape has flexible hose. Length of tubing is 64" (162.5 cm) extended, 20" (50.8 cm) compressed. Tubing diameter is .875" (2.2 cm).

Easy Irrigation Tower #O-LPA

Lift-Assist™ Technology Neutralizes Irrigation Bag Weight

Lift-Assist
Technology
Makes Vertical
Adjustment
Easy

Four independently adjustable hooks each safely support up to 10,000cc of fluid. Comfortable, quick-release knobs permit vertical adjustment of hangers from 5.5' to 8.5' (1.67 m to 2.59 m). This nurse-friendly design makes it easy for personnel to operate.

- **Stable:** Our tower doesn't require sandbags or special weights to stay up
- **Nearly Effortless:** Lift-Assist technology makes vertical adjustment easy
- **Simple:** Spring design
NO complicated hydraulics to fail
NO battery to remember to charge
- **High Capacity:** Holds up to 40,000cc (10,000cc max capacity per hook)
- **User-Friendly:** Easy-to-reach hangers range from 5.5' to 8.5' (1.67 m to 2.59 m)
- **Convenient:** Four independently adjustable hooks
- **Ergonomic:** Comfortable, quick-release knobs

Lift-Assist Technology

Unique spring-loaded elliptical knob unlocks when squeezed and locks securely in place when released. The Lift-Assist articulation is done mechanically; there are no hydraulics or batteries to fail.

Accuracy

The hanger height is displayed in inches and centimeters for your convenience.

Orthopaedics

Allen® Lift-Assist® Beach Chair #A-91500 CE

Lightweight With Lift-Assist™ Technology To Make Positioning Easy

The Lift-Assist Beach Chair is designed for use with orthopaedic procedures using the Fowler's or beach chair position. The chair offers unobstructed access and the Lift-Assist mechanism makes repositioning the patient quick and easy. The Lateral Slide feature enables the surgeon to move the patient closer to the edge of the OR table for increased surgical site access. The Lift-Assist Beach Chair weighs under 30 lbs (13.6 kg) without the back support panels installed.

- Attaches to the rails of standard OR tables
- 500 lbs (227 kg) patient weight capacity
- Lateral adjustment - improved surgical site access
- Lightweight - for single person set-up and removal
- Rail width 20" - 26" (50.8 cm - 66 cm) - fits a wider range of OR tables
- Spring Lock Quick Connect - easy installation and removal of head positioners
- Rail clamp indicators - display when the Beach Chair is properly installed on the OR table rails
- Small rail clamp footprint - frees up accessory rail space needed for different procedures
- No gas spring cables to repair or break
- Removable back panels increases access to surgical site
- Low-cut backboard - excellent maneuverability during total shoulder procedures
- Optional head positioner lock helps support patient's neck

Universal™ Head Positioner

Adjusts Intraoperatively

Easy To Use Disposable

Single Knob
Releases All Joints

Universal™ Head Positioner #A-90026 CE

Easy To Use And Protective Head Positioning For The Beach Chair Position On The Operating Room Table

The Allen® Universal Head Positioner supports the patient's head and neck providing adjustability and ease of positioning. Designed for simple set-up and use. It supports the patient's unique anatomy securely and comfortably and offers more versatility than competitive head supports.* In addition, the disposable straps which support the head and neck are comprised of wide soft protective padding. Straps are designed to distribute force to help reduce the risk of pressure injuries.

Ideal for use with most upper extremity procedures in the beach chair position.

- Multiple straps for secure control of patient's head and neck
- Single knob releases all joints
- Easy intraoperative adjustments
- Adjustable to help accommodate the patient's head
- Disposable wide soft straps minimize pressure on skin
- Lightweight and portable
- Simple set-up, easy to use
- Secure head and neck with ability to lock the desired position
- Compatible with all Allen Beach Chairs

Allen® Arm Positioner #A-92000 CE

Spend Your Time On The Procedure, Not The Positioning

The Allen Arm Positioner delivers easy arm positioning for shoulder surgery in the Beach Chair position, as well as elbow and clavicle procedures. By indexing at the elbow, the device is able to gain complete positioning control of the shoulder joint. The revolutionary patent pending design allows the entire device to be steam sterilized and provides an unobstructed access to the surgical site. The device also has the capability of achieving a semi-locked state allowing the surgeon to simply move the arm where he wants it without having to adjust the tension.

Ideal for use with all open and arthroscopic upper limb procedures.

- No foot pedal, no hoses, no hydraulics, no power cords
- The only fully autoclavable arm positioner on the market
- Single knob releases all joints
- Lightweight device weighs only 6 lbs (2.7 kg). No cart required.
- Easy, fluid positioning for enhanced site access
- Connects over the drape, in the sterile field
- Compact and portable for easy storage
- Index at the elbow for complete control
- Quick and easy set-up
- Unobstructed access to the surgical site (no bars or foot pedal obstructions)
- Patient Weight Capacity: 500 lbs (227 kg)

Allen® Hug-U-Vac® Lateral Positioners

#A-60003, #A-60002

Safe, Comfortable And Secure Lateral Patient Positioning

The Allen Hug-U-Vac Lateral Positioner safely and comfortably holds patients in lateral and supine positions. The Allen Hug-U-Vac Lateral Positioner's integral quick-release straps enable it to attach securely to the rails of standard OR tables.

The Allen Hug-U-Vac Positioner has a secure valve that eliminates the need for continuous suction.

Ideal for use with Urology Procedures, Orthopaedic Procedures, Cardiothoracic Procedures, Neurological Procedures, Thoracotomy Procedures, Plastic Surgery and General Surgery. Can be used for supine positioning in a variety of procedures.

- Enables secure lateral and supine positioning in a variety of procedures
- Integrated axillary pillow
- Lightweight for easy transport, set-up and storage
- Valve location designed for quick access to anesthesia
- No continuous suction required
- Durable vacuum valve with on/off switch and lock
- Disposable slipcovers are waterproof for easy clean-up

Active Heel™ Technology
Shown Without Boot Shell

One Boot Accommodates Many
Foot Sizes & Left Or Right Foot

Easy To Use Buckles

Allen® Traction Boot CE

Active Heel™ Technology Provides Superb Security To Help Prevent Foot Slip

Positioning the leg and foot properly during trauma and hip fracture cases is critical to a less stressful surgery and successful outcome. Many hospitals are still using the original boots that may be decades old and require copious amount of tape to help secure the foot. To mitigate these challenges, Allen has introduced the Allen Traction Boot with Active Heel Technology to help prevent foot slip while providing superb security.

With its modular design, you can upgrade your existing trauma tables to the latest technology that has benefits for the patient, surgeon and OR staff.

Active Heel technology utilizes two cushioning pads on the anterior and posterior portions of the leg to provide a secure grip on the entire ankle joint versus the competition which relies on a single point of fixation.

- Active Heel Technology
- Accommodates foot from sizes 5 (female) to 14 (male)
- Universal: One boot fits left or right foot
- Easily retrofits your existing Mizuho OSI, Steris®, Maquet® and Schaerer® traction tables
- Eliminate the need for excessive taping
- Patient Weight Capacity: 500 lbs (227 kg)

Leg Holder Disposable Pads #R-S4133-V

The Leg Holder Disposable Pad is compatible with all Allen® leg holder systems. These pads utilize two special foam materials which are laminated together. The outer pad is a dense, slightly compressible material which allows for high clamping pressure to stabilize the leg. The inner pad is a soft, fully compressible material for gentle, non-abrasive contact with the skin. The leg pad secures with simple Velcro® fasteners. Length is 37.75" (95.9 cm) and width is 3.375" (8.6 cm). (Sold In Cases Of 12)

Arthroscopic Well-Leg Holder #O-AWLH

Easily and safely position the non-affected leg during arthroscopic knee procedures. Help reduce the discomfort and circulatory impairment that can result from the well-leg hanging over the edge of the table. Smooth adjustment and locks securely for precise positioning.

UK #A-40018-UK

For Round Posts

Rail Clamp #O-RC2

Securely locks accessories with flat mounting blades anywhere along the table side rail. Attaches at standard OR table rail ends or rail notches. Perfect for tabletop extensions and knee/foot board applications. Strong and lightweight replacements for original rail locks. Accessories can be mounted either vertically or horizontally. Reduces the "free play" associated with standard clamps. Accepts 1" x .25" (2.5 cm x 0.6 cm) flat accessories. Patient Weight Capacity: 720 lbs (327 kg).

For Rectangular Blades

Accessory Cart #A-30010

The Accessory Cart provides convenient storage for most of your surgical table accessories. Six rails and a deep bin afford plenty of storing space. Optional accessory hooks allow quick and easy storage. Weighted base makes cart tip-resistant and reduces potential vibration during transport. Polymer base is dent-resistant. Heavy-duty casters roll smoothly. Two casters lock for safe and easy loading, unloading and storage.

What's Included

Protect Your Investment

Stirrup Cart #A-30015

A great way to store and protect your investment, this strong and lightweight cart holds and transports your stirrups or legholders. Compact and state-of-the-art, the cart will hold any Allen stirrup. The sturdy molded four-caster polymer base is dent-resistant. The deep storage bin is a great place to store clamps and pads securely. Two casters lock for safe and easy loading, unloading and storage.

Two different size hooks allow this storage cart to hold a variety of stirrups. Hold up to a .75" (1.9 cm) rod on the smaller hook and up to a 1" (2.5 cm) on the larger hook.

Allen® Beach Chair Cart #A-90100

The perfect companion, the Allen Beach Chair Cart conveniently stores the Allen Beach Chair and all of its accessories. The Beach Chair rests securely on sturdy rails at user height to help reduce potential back strain. Optional accessory hooks allow quick and easy storage for larger accessories. Deep bin affords plenty of extra storing space. Weighted base makes cart tip-resistant and reduces potential vibration during transport. Polymer base is dent-resistant. Heavy-duty casters roll smoothly. Two casters lock for safe and easy loading, unloading and storage.

Easy Rack #O-MR2

The Easy Rack will provide convenient storage for your stirrups, armboards, clamps, straps and other table accessories. Constructed with dent-resistant polymer. Specially designed hooks will store stirrups and can be placed onto rack just like they came off the table. No need to readjust to fit on rack. Unique key slots accept .25" x 1" (0.6 cm x 2.5 cm) flat and .625" (1.6 cm) round mounting posts without the need for clamps. Requires appropriate wall fasteners (not included).

Comfort Mat #O-CM

Step Onto Comfort And Feel The Difference

The Comfort Mat is a closed-cell, absorbent-resistant foam which helps reduce fatigue, pain and discomfort associated with standing for long periods of time. The beveled, low profile edges facilitate easy access to the surface. The surface measures 20" x 33" (51 cm x 84 cm), but is also available in custom sizes. This non-slip surface is chemical resistant. Custom mats are priced per square inch.

Anesthesia Screen With Wings #O-ASLW

Single point mount provides easy attachment and removal. Adjusts vertically from 22" to 30" (56 cm to 76 cm) and rotates horizontally for added flexibility and convenient patient access. Folds flat for easy storage. The .625" (1.6 cm) mounting post fits standard clamps. Adjustable drape support wings pivot in all planes and lock with a simple twist.

Needle Trier™ Device #A-75000

Help protect your staff from sharps injuries with the Allen® Needle Trier. This suture needle retrieval system has a large magnetic surface to easily pick up ferrous needles and sharps as small as .006" (.15 mm) diameter. Our unique design allows this magnetic sweeper to reach under the surgical table and other hard-to-reach places. The lightweight aluminum is easy to use and store. The long handle, more than 3' (1 meter), means you don't need to bend over to find lost sharps.

Post Moves In and Out to Accommodate Various Table Widths

Adjustable Footboard #O-AFB

Adjustable width accommodates outside rail dimensions of 21" to 23.25" (53 cm to 59 cm). Attaches horizontally as a table extension to accommodate taller patients or vertically as a foot support. Easily mounts to the foot section side rails of a standard OR table. Radiolucent construction permits unhindered imaging. Includes 2" (5 cm) premium pressure management pad to reduce heel pressure. Patient Weight Capacity: 500 lbs (227 kg).

Frogger™ Pad #H-009-00-100 CE

Use the Frogger Pad to position patient's legs during saphenous vein harvesting. The cushion splays legs slightly so that knees tilt outward—providing easier access to the surgical site as well as a stable platform on which to operate. Useful for both minimally invasive endoscopic procedures as well as for the traditional groin-to-ankle incision.

The cover is made with 4-way stretch material. Inside construction includes a top layer of conforming foam with soft yet supportive foam beneath.

Greater Saphenous Vein

Extremity Positioner #H-009-00-110

The Extremity Positioner is used most frequently for prepping extremity surgical sites. It is also used for positioning the leg for foot and ankle procedures.

Foam Well-Leg Holder #H-009-00-120

The Foam Well-Leg Holder supports with comfort the non-affected, well-leg during arthroscopic knee procedures, fracture repairs and cast procedures.

Bariatric Product Offering

Ultrafins® Stirrups #O-UFAS ☼

The Ultrafins Stirrup is the latest in bariatric lithotomy positioning. This stirrup features a roomier boot for larger calves. Piston technology helps to position heavy legs with less effort. Includes clamshell-type boot pads. Patient Weight Capacity: 800 lbs (363 kg).

Note: Nissen Thigh Straps are Sold in Pairs

Allen® Hug-U-Vac® Large Steep Trend Positioner #A-60005 ☼

The Allen Hug-U-Vac Steep Trend Positioners are Vacuum Activated Positioning Systems that have been specifically designed to hold patients safely during procedures requiring the steep Trendelenburg position while maximizing surgical and anesthesia access to the patient. The Allen Hug-U-Vac positioner has integral quick-release straps that enable it to attach securely to the rails of standard OR tables. The Allen Hug-U-Vac Steep Trend Positioners unique pliable design enables it to inflate and deflate evenly to fit the patient's body. Patient Weight Capacity: 500 lbs (227 kg).

See page 61 for more information on the Large Steep Trend Positioner.

Fits US Rails Only,
Depending on Table
Limitations

8" Bariatric Table Width Extender

Bariatric Table Width Extender (TWE) increases the support surface of your surgical table by 8" (20 cm) on each side.

- Attaches to the back, seat and leg sections to create extra width needed by larger, heavier patients.
- Full length extender provides ample support for patients.
- Shorter extender provides space on table rail for weight-bearing accessories (stirrups, thigh retractors, armboards, etc.)
- Patient Weight Capacity: 1,000 lbs (454 kg)

Bariatric Armboard #A-80200

Our Bariatric Armboard is exactly what you need to help secure larger patients. It is easy to mount and easy to use. The spring lever mounting mechanism, accessible from both sides, securely locks the armboard to the rail. The trigger adjustment offers easy articulation as well as fine increments of adjustment to allow for precise positioning. The tooth-free mechanism is engineered to withstand the rigors of the operating room. Purchase contoured armboard surfaces or our unique inclining surface that does not require extra padding to prevent hyper-extending the arm. Armboard is 8" (20 cm) wide and 26" (66 cm) long. Patient Weight Capacity: 1,000 lbs (454 kg).

Surfaces, Pads & Gels

Allen® Perioperative Surfaces & Pads

Allen Medical offers a variety of pads to fit your standard OR tables and armboards. Allen has over 10 years of experience in the area of pressure management. The engineered foams in our OR table pads were cutting edge when first developed and our products have remained at the forefront of technological innovation ever since – with new radiolucent foam formulations and multi-density pad layouts.

Why OR Table Surfaces Matter...

Healthcare professionals are implementing new prevention initiatives and standards for pressure injury prevention.

From a surge in recent research pertaining to pressure injuries to the Medicare Guidelines that took effect in October 2008, the issue of hospital-acquired pressure injuries is a popular topic for many healthcare professionals. Additionally, professional organizations like AORN and NPUAP are critical to advancing awareness of the issue through their release of new standards and practices to help prevent and treat hospital-acquired pressure injuries.

- Static surfaces increase surface support areas and decrease pressures and shear forces.⁴
- Old-fashioned “egg crate” mattresses offer no advantage.⁴
- A study of 1,128 surgical patients, revealed the incidence of nosocomial pressure ulcers related to the operating room (OR) was 23%.⁵
- A multi-layer pressure redistribution surface was found to be statistically significant in reducing pressure ulcer incidence when compared with the “Standard” OR table pad.⁵
- Surgical patients account for 34-42% of all hospital-acquired pressure ulcers.²
- In an experiment involving 323 patients between 2000 and 2004, 38% of patients who had the standard pad during surgery developed the sores. But only 7% of patients who had the pressure-relieving pad developed pressure ulcers.⁷
- Various studies have suggested that pressure ulcers may occur within a 1 to 4 hour time frame, well within the range of current surgical procedures.⁶

Allen® Surfaces Technology

No Single Foam Provides Effective Pressure Management...

Allen Uses 4 Foams For Effective Pressure Management

Optimal pressure management requires a pad that is effective in four main support functions: 1-conforming to the patient's body, 2-providing proper support, 3-prohibiting bony prominences from bottoming out and 4-evening out irregularities and gaps in the table surface.

No single foam can support all four functions effectively. Listed below are the 4 foams Allen has proven effective to provide optimal pressure management in a single pad.

"Neither the position of the patient, nor the time spent on the OR bed can be altered easily during surgery."

Varying the type of pressure-reducing mattress may be the most appropriate method to prevent pressure ulcers during the perioperative period."

- Alexander's Care of the Patient in Surgery, 13th Edition

Astrus Elite™ Surfaces

Effective Pressure Management Our Astrus Elite Surfaces have a 4-layer foam composite construction that helps protect patients four ways. A top layer of conforming foam molds to your patients' anatomy. The pressure displacement foam middle layer transfers pressure off the bony prominences and the closed cell foam bottom layer prevents bottoming out. The anti-shear cover helps protect patient's skin. Offered with integral gel layer (gray bottom) or without (black bottom.) Available in 3" (7.6 cm) and 4" (10 cm). Velcro® kit included. Non-conductive.

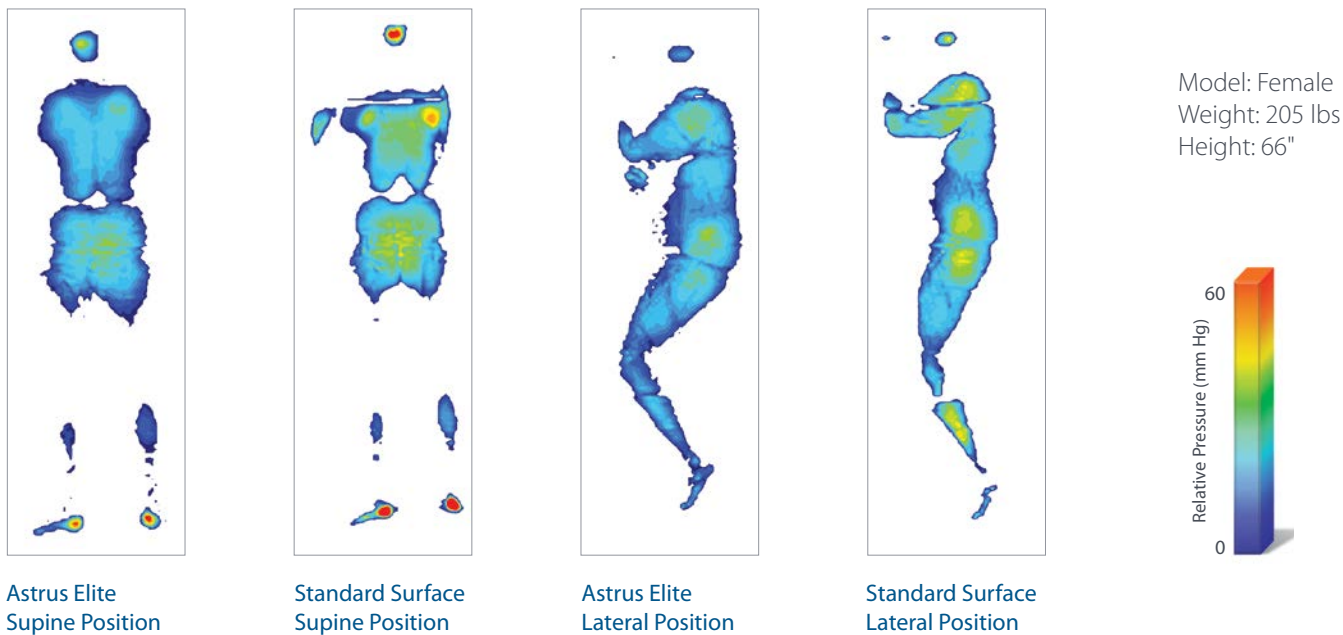

Standard & Deluxe Surfaces

Standard Surfaces: Our conductive Standard Surface is equivalent to the pads that are typically provided with new surgical tables. It combines supportive urethane foam with a 'Lectrolite®' cover.

Deluxe Surfaces: Our conductive Deluxe Surface features supportive foam and a stretchable cover for added patient comfort. Recommended for use during shorter procedures and with patients who are determined to be at lower risk for developing pressure injuries. Velcro® kit included.

Standard & Deluxe Armboards Surfaces

Deluxe Surfaces: Recommended for use during shorter procedures and with patients who are determined to be at lower risk for developing pressure injuries. Velcro® kit included.

Standard Surfaces: Our conductive Standard Surface is equivalent to the pads that are typically provided with new surgical tables.

All armboard pads sold individually.

Standard Surfaces

Warranty Information

Allen products shall be free from defects in material and workmanship for a period two (2) years. There are exceptions to this as defined by the product groups or types as detailed below. Exceptions to the two (2) year warranty carry a one (1) Year Warranty as follows:

- Allen® Advance Table
- Advance Table L2P™ Platform
- Allen Hug-U-Vac®
- Pad products inclusive of the following:
 - Gel Pads, Vacu-Gel®, Vacu-Form®
- Foam Positioners

Warranty does not cover misuse, abuse, neglect, or lack of routine maintenance. In order for an item to be eligible for warranty, the serial or lot number must be on the product. Contact Customer Service or your Sales Representative for additional warranty information.

Return Policy - US Only

The guidelines below must be followed in order to initiate a return for credit:

- A Return Material Authorization (RMA) # must be obtained within thirty (30) days of invoice date by calling our Customer Service Department (800) 433-5774.
- An RMA number is valid for fourteen (14) calendar days. The RMA Label must be affixed to the outside of all shipping cartons. Product received without the RMA label or beyond this (14) day period will be refused.
- Product must be in new, unmarked, saleable condition. We will issue full credit following inspection of product. Product not in new condition is subject to a 20% restocking fee or may be returned with no credit.
- Pad products, including gel pads, Vacu-Gel, Vacu-Form, FlexiForm, Allen Hug-U-Vac and foam positioners, returned within thirty (30) days of the invoice date are subject to a 20% restocking fee.
- Shipment damages for product shipped using our carrier, should be reported to Customer Service Department within fourteen (14) days of invoice date.
- Disposable and Custom product is not returnable.

Products Are Not Made With Natural Rubber Latex

Product Serial Number Information

Allen Medical Systems' equipment (hard goods) is serialized and includes a serial number label. There are two types of labels (white or silver). Both contain six digits which may be preceded with a letter.

Type 1

Type 2

All Sterile and most non-sterile disposable products contain a lot number on the outside package/box.

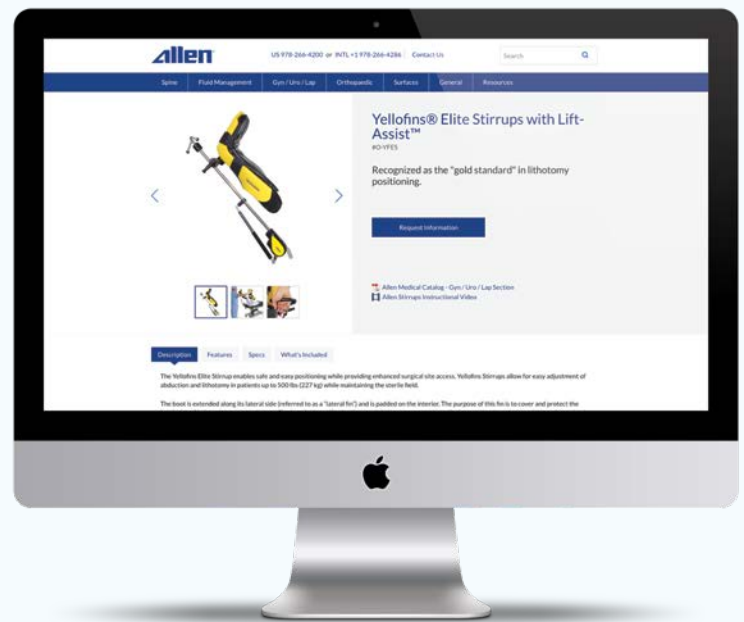

Surfaces and Pads have a letter/digit date code on the label that is attached to the underside of the pad.

In order for an item to be eligible for warranty, the serial or lot number must be on the product.
