

The Adatto hospital bed is an economically sound alternative. Adatto has 4-sectional mattress base and it comes with a wide range of assemblies and options. Other Merivaara bed accessories are compatible with Adatto.

Due to its adaptability, wide range of accessories and excellent handling, Adatto is suitable for use from long-term wards to ICU wards. Adatto's modularity allows it to be adapted to suit any need.

Design castors, \varnothing 150 mm or \varnothing 125 mm. Central locking system.

PJP castors, \emptyset 125 mm. Central locking system.

Individual locking castors, Ø 125 mm.

The bed can be extended with 20 cm adjustable bed end and extension board. The extendable bed end fits all models.

Extension board: 80 cm 10000 **0718** 90 cm 10000 **0728**

Mini-ACP limiter Battery series

The grab handle is a safe and ergonomic patient assistance device, which is suitable for use with most patients. The grab handle enhances patient self-initiative. The unique fixing of grab handle does not widen the bed, thus allowing it to fit easily through doors and into elevators.

Excellent treatment capabilities

Correct, variable treatment positions are of the utmost importance for patient well-being. Studies show that a versatile use of bed adjustments considerably reduces pressure on the skin and activates and rehabilitates the patient.

The multiple positions of the Adatto bed can be easily adjusted using a hand controller. The sliding and rising adjustment of the back section combined with the leg angle adjustment keeps the patient's centre of gravity firmly in place. The skin is not stretched, and the risk of pressure sores forming reduces significantly. According to studies, there is up to 90% less shifting in the centre of gravity compared to two and three-sectional beds.

The Adatto hospital bed's range of adjustments is truly extensive. The mattress base is also easily extended using an adjustable foot end and extension board.

Adatto is a tool, which is designed to facilitate nursing work. Adatto's lightness and ease of use make patient transfers and supporting treatment positions easy, while reducing back strain on the nursing staff.

Adatto bed with Nova Sensiva mattress

- 40° back angle
- 35° hip angle
- knee angle in upper position
 Average pressure: 4.22 mmHg
 Maximum pressure: 20.0 mmHg

Two-sectional bed with basic mattress

- 40° back angle
- 0° hip angle

Average pressure: 56.2 mmHg Maximum pressure: 200 mmHg

The cardiac chair position is the recommended resting position for many different patient groups.

The Fowler position with knee angle adjustment distributes evenly pressure on the skin and relieves swelling in the lower extremities.

The electrically-adjusted back section has a sliding, conforming movement.

The Psoas position relaxes the back and relieves swelling in the lower extremities.

The CPR position can be quickly adjusted using the manual Trendelenburg handle.

This position combines back angle and Trendelenburg adjustments.

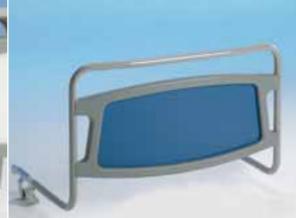

Functional design and colour options

Special attention was given to functional ergonomics and patient comfort in designing the Adatto hospital bed. The bed has user-friendly handling surfaces and its colour range has been carefully selected. The bed and its accessories are visually compatible with other Merivaara products.

Silent and practical functions together with the extensive range of accessories support daily nursing tasks and improve patient comfort.

The Environmental Management System of Merivaara is certified according to ISO 14001:1996 standard. Having been in operation since 1901, Merivaara can guarantee the customer that its products are functional and safe.

Best for the patient, best for the nurse. For one hundred years.

Light and handy hospital bed

Medium subframe adjustments (electrically operated)

Long subframe adjustments (electrically operated)

Trendelenburg and anti-Trendelenburg adjustments

TECHNICAL SPECIFICATIONS

- frame: epoxy coated steel; several colour options
- mattress base: 4-sectional, specially-contoured plates in ABS plastic
- height adjustment mechanism: epoxy coated steel
- castors: Ø 125 mm or 150 mm, central braking system, with a directional castor
- bumper rollers on mattress base corners

DIMENSIONS

- overall length: 2156 mm (Scandinavian model) (medium subframe) or 2237 mm (long subframe)
- bed width: 830 mm or 930 mm
- overall width: 885 or 985 mm with side rails mounted
- recommended mattress size: 750 x 2000 mm or 850 x 2000 mm
- weight: approx.100 kg without accessories
- maximum load: 225 kg with equipment

ADJUSTMENTS

- mattress base height adjustment: 415 780 mm hydraulically or 445 – 810 mm electrically operated
- back section: electrically operated or gas spring-assisted, ergonomically sliding and rising movement
- thigh section: electrically operated or gas spring assisted
- calf section: manually operated (gas spring assisted)
- Trendelenburg (26°) and anti-Trendelenburg (7°) adjustments manually operated (gas spring assisted)

ACCESSORIES AND OPTIONS

Extensive selection of accessories and colour/design options

- various bed end models and colour options
- frame colour options
- castors Ø 125 and 150 mm
- side rails (different models)
- grab handle
- · lifting poles
- IV rods
- monitor / journal tray
- various utility baskets
- urine bottle holder
- mini-ACP limiter
- battery series

3-year guarantee
