

The B-Scan Plus®

HD Imaging at your fingertips...

Product #
24-6100

The B-Scan Plus' proprietary software combined with unique probe electronics make it the only portable High Definition B-Scan.

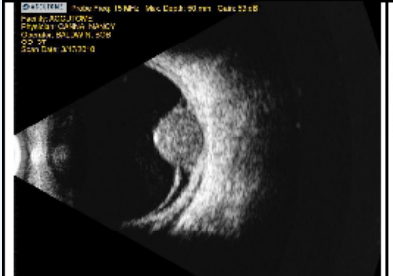

While developing the B-Scan Plus software, Accutome visited many of the top facilities around the world. The results are a reliable and easy-to-use unit, which can quickly scan patients and transport information.

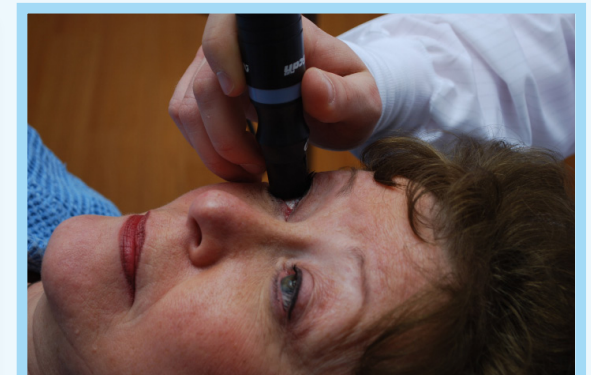

- Image is Everything – 0.015 mm resolution is the highest in the medical industry.
- State-of-the-Art Probe Design – Sharper, more focused images due to the elimination of signal loss.
- Unsurpassed Data Analysis – Contains 4 useful measuring tools along with corresponding A-Vector for diagnosing ocular pathologies.

- “Smooth Zoom” Technology – The only unit with 2x full image zoom without distortion of real-time or captured scans.
- Portable – Plug probe into any laptop or PC and go.
- Never Miss an Image – Unlimited 34 second film loops.
- Share Information Easily – Adaptable document transfer via EMR, email or printer.
- Compact File Storage – Unsurpassed by the competition.
- Protect Your Investment – Easily upgradeable software.
- Master in Minutes – User-friendly interface makes user manuals and quick start guides unnecessary.

Creates Reports in Seconds

Built in Report Template Containing Image, Diagnosis, Patient and Facility Information all in a Microsoft™ Word Document.

Diagnostic B-Scan Report		Date: 6/21/2010 12:22:28 PM
<p>Optimalistic echographic interpretation is an invaluable diagnostic aid to the clinician. However, as with all diagnostic testing, it should be utilized only in conjunction with other clinical and laboratory parameters to formulate diagnostic and therapeutic decisions.</p>
