Fact Sheet

CODAN ARGUS 717V / 718V - Volumetric Infusion Pump

en

Technical Data **Software 5.0X** Remarks

Performance Data

intensive care, anesthesia, standard care, oncology, blood transfusion, parenteral nutrition, neonatal care **Applications**

Dosing units Flow rate

g, mg, µg, ng, IU, mmol 0.1 – 1'200 ml/h 0.1 – 999.9 ml / 1'000 – 9'999 ml Infusion volume

Infusion time 1 min - 99 h 59 min

Programming rate in ml/h, volume in ml, duration in h and min

Automatic rate calculation Bolus administration on the basis of volume and time manually or automatically 0.1 – 1'200 ml/h Bolus rate

0.1 - 999 ml Bolus volume Purging of the infusion line 0.1 - 1'200 ml/h

Accuracy ±5%, depending on the used, supported infusion set

0.1 - 10.0 ml/h

KVO (Keep Vein Open) rate Standby mode 1 - 60 min

History and Interface

with time stamp 24 V / 0.2 A, configurable pulse, potential-free electrically isolated, connectable to PDMS (Patient Data up to 1'000 events History and event log connection to the central system Nurse call RS-232 interface

Management System)

Operation Display type monochrome LCD, 98.4 x 26.2 mm, 240 x 64 pixel

flow rate in units and ml/h, infused volume, target volume (VTBI), infusion time, remaining infusion time, battery capacity, pressure level, medication name and setup, bolus

delivery and information menu etc. intuitive and configurable for specific applications Menu overview

Menu configuration by means of ARGUSservice software / temporary settings by operator

Infusion lines CODAN standard- and cyto-sets and other validated sets

A718V: CODAN IVP® dedicated set

illuminated, adjustable brightness

dose calculation, TIVA

steps of 1 min

steps of 0.1 ml/steps of 1.0 ml

without infusion interruption

without infusion interruption

display text in national language, overview of infusion data client-specific configuration possible

per hour, minute, kilogram, day steps of 0.1 ml/h, modification without infusion interruption

rate in ml/h, volume in ml, infusion duration in h and min with / without dose limit, limits via ARGUS*medDB*

under normal conditions according to IEC/EN 60601-2-24,

technical deviation $< \pm 1\%$ depending on flow rate, deactivation possible

tube materials: PVC, PVC-free, NoDEHP / display of the set

with anti-freeflow-clamp

Safety

Display contents

automatic pressure release after occlusion Pressure release Air bubble detection individual air bubbles

accumulated air bubbles Drop detector 10 - 65 drops/ml

Alarms, pre-alarms visual and audible signals for rapid detection

Alarm types occlusion (up- and downstream), air bubbles, no drops and too many drops, end of infusion, standby, low battery, end

of battery, maintenance due etc. activation / deactivation via numerical code

Key lock

DERS: Medication database 256 medications for download

configurable from 50 - 1'000 μ l configurable from 100 - 2'000 μ l within 8 - 64 min

in transport mode alarm is less sensitive

with text explanation and symbols, large alarm window

Pressure limit for occlusion 100 - 1'000 mbar (also in mmHg, kPa, cmH2O, Psi) 10 configurable steps

(Dose Error Reduction System)

see ARGUSmedDB fact sheet and instruction

Power Supply

Battery 1'800 mAh, NiMH 6 hours at 25 ml/h Battery operation

Battery charging time 9 hours

230 VAC ±10%, 50 - 60 Hz Mains power supply

Power consumption 12 VA maximum maintenance-free

in standby mode

option: 115 VAC ±10%, 50 - 60 Hz

without combination clamp

according to EN 60601-1

Product Specification

Dimensions 190 x 160 x 130 mm (W x L x D)

ASA high performance plastic 5 – 40°C / 18 – 30°C Housing Operating-/ medication temperature Temperature for storage and transport 0 – 40°C

Relative humidity 20 - 90% without condensation

Weight with battery 2.0 kg including battery and power supply unit Maintenance safety standard check (SSC): every 24 months or after 10'000 operating hours

Compliance

IP protection class drop-protected in horizontal position up to ±15° inclination IP22 Protection class electric shock protection according to IEC 61140 Ш

Applied part type CF Ilb

MDD classification EN 60601-1, EN 60601-1-4, EN 60601-2-24 Electrical safety

EN 60601-1-2 Electromagnetic compatibility

Certification CODAN ARGUS AG ISO 13485, ISO 9001

CE 0120 Device CE mark according to directive 93/42/EEC

Accessories

Docking stations ARGUS docking stations in 3 sizes for different version M: monitoring (PDMS link) + power supply

version P: only power supply combinations combination clamp suitable for pole- and rail systems Attachment system

ARGUSservice program for simple maintenance and configuration ARGUS*medDB* database for medications with ARGUS rails
